Full analysis

Overview

This is the corporate website of Abhishek Group, an India-focused automotive industrial group. It presents company history, group companies, leadership information, automotive safety activities, recycling and vehicle-scrappage partnerships, news, customer-quality commitments, and business locations, indicating an informational and B2B-oriented corporate model.

Scam/Impersonation Risk

No contradictions were observed across the site's corporate presentation, identity-related content, technical behavior, and evaluated external reputation checks. The homepage and company pages describe a coherent industrial business rather than a deceptive investment, payment, or credential-harvesting operation; the site presents automotive safety products, manufacturing subsidiaries, and vehicle-scrappage activity, including a partnership with Kaiho Sangyo of Japan. No login form, hidden sensitive form, wallet connection, phishing behavior, or brand-impersonation indicator was detected. The available external checks reported no malicious or phishing findings, although reputation coverage was not complete.

EVIDENCE

- The homepage and company pages describe Abhishek Group's automotive history, group companies, chairman, customer commitments, and Indian operating locations.
- The news content identifies vehicle-scrappage facility activities involving Abhishek Group and Kaiho Sangyo Japan.
- Behavioral inspection found no login form, hidden form, password submission to an external destination, wallet activity, cloaking, or clipboard manipulation.
- Evaluated external reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist finding.

Regulatory Verification Notes

The site's legal and identity presentation is consistent with an established corporate information website: it provides company history, group-company information, leadership details, contact access, and privacy/cookie policy content. The registration record identifies Cantik Technoloiges Pvt Ltd, while the public-facing brand is Abhishek Group; this supports a need for ordinary independent identity confirmation but does not constitute an identity contradiction. No regulated financial or investment service is presented, and no licensing or registration number is disclosed in the supplied pages; this is a transparency item for applicability review rather than evidence of a scam. The domain is registered through GoDaddy.com, LLC, and the transport certificate is valid and issued by a recognized certificate authority.

EVIDENCE

- Domain registration: 2018-11-13; age 7.78 years; registrar GoDaddy.com, LLC; registrant organization recorded as Cantik Technoloiges Pvt Ltd.
- Hosting: AS26496, AS-26496-GO-DADDY-COM-LLC - GoDaddy.com, LLC, US.
- TLS certificate: Go Daddy Secure Certificate Authority - G2, DV validation, valid to 2026-10-03T07:49:02+00:00.
- The company's history, leadership, group-company, contact, privacy, and cookie content are available through the site's corporate navigation.

What to Verify Next

Before credential or payment interactions, an external party should confirm that the named operating company is authorized to represent the Abhishek Group brand, validate any applicable corporate or sector-specific registrations with the relevant Indian registry, and review the applicable commercial, return, and payment-protection terms. Contact details should be corroborated through an independent corporate source or offline channel rather than relying solely on the website.

EVIDENCE

- The site provides dedicated company, chairman, group-company, customer, news, and contact sections suitable for cross-checking the claimed business structure.
- The supplied content contains no regulated-product licensing claim or license number.
- The site is primarily informational and contains no sensitive transaction form in the captured pages.

Summary Verdict

The website has a high-trust, low-risk posture and the available evidence is consistent with an established, apparently legitimate corporate website. No scam, phishing, impersonation, or other identity contradiction was observed, but the real-world operator connection remains independently unverified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with the observed address belonging to the CDN edge and no origin candidate identified in the analysis. This reduces direct origin exposure and is a mitigating infrastructure signal, but it is not independent proof of corporate legitimacy.

Closing Assessment

Ordinary informational use is proportionate; before submitting credentials or making payments, independent confirmation of the commercial counterparty, applicable terms, and payment protections should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about abhishekgroup.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
