Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Absa Bank Kenya PLC's website is the official homepage for a Kenyan banking institution, presenting personal, business, corporate and Islamic banking alongside accounts, credit cards, loans, insurance, wealth management, payments and online banking, with the apparent purpose of providing and servicing regulated financial products.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent institutional identity, provides a conventional banking service structure, and uses a normal login pathway without hidden forms, suspicious redirects, wallet-drainer behavior, or other deceptive interaction patterns.

- The homepage identifies "Absa Bank Kenya PLC" and presents a consistent corporate-banking service catalogue.
- Behavioral testing recorded no cloaking, hidden forms, clipboard hijacking, wallet-provider activity, or password submissions to external forms.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist match.

Regulatory Verification Notes

The site identifies the Kenyan legal entity and states that it is regulated by the Central Bank of Kenya. This supports the site's institutional presentation, while the supplied page evidence does not show a specific license or registration number; that is a limited disclosure point for formal verification, not evidence of deception. No separate broker-related reputational match was identified.

- The homepage states that Absa Bank Kenya PLC is regulated by the Central Bank of Kenya.
- Domain registration: created 2018-03-20 and expires 2027-03-20; recorded age 8.38 years; registrar Lexregistration Limited.
- The site's transport encryption uses a valid DV certificate issued by YR2, expiring 2026-10-05.
- Hosting telemetry identifies AS63949, operated as AKAMAI-LINODE-AP - Akamai Connected Cloud, SG.

What to Verify Next

For formal onboarding or high-value institutional engagement, confirm the entity and regulatory status directly through the Central Bank of Kenya's official registry and independently validate the organization's published

contact channels. Standard account login and ordinary banking use are appropriate.

- The homepage supplies the legal entity name and regulatory claim needed for registry comparison.
- The site provides account, lending, insurance and online-banking pathways that can be matched against the institution’s official service records.
- The domain’s registration and certificate validity provide concrete identifiers for independent confirmation.

Summary Verdict

The website presents as a legitimate, established and trustworthy banking platform with a coherent institutional identity and no observed contradiction or deception pattern. Its overall posture supports normal interaction, including account login and standard transactions.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, and observed addresses belong to CDN edge servers rather than an exposed origin. This reduces direct origin exposure and is a positive protective factor, although it is infrastructure mitigation rather than proof of legitimacy.

- Served through Akamai-protected edge infrastructure.
- Observed edge address 178.79.178.218 is associated with AS63949; a second observed edge address is 2a01:7e00:e000:3f7::.
- No likely origin IP candidate was identified in the infrastructure analysis.

Closing Assessment

Normal account access and standard banking activity are proportionate uses of the site; formal institutional engagements should additionally complete the applicable registry and contact-channel checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of absabank.co.ke.

- The request stayed on absabank.co.ke. It was not redirected to another domain. CLEAR
- Registration is published under Lexregistration Limited. CLEAR

- DNS for this domain is served by co.ke, across 3 name servers. **NOTED**
- The registration is paid up to 2027-03-20. **NOTED**
- It is hosted on AKAMAI-LINODE-AP, from a server in US. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about absabank.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
