

Is abtloman.com a scam? TrustSniffer's high-risk assessment: 5/100

abtloman.com

Verdict

5

OUT OF 100

CRITICAL RISK

abtloman.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple coming-soon landing page with brief welcome text, subscription and contact fields, and filler lorem ipsum. No transactional elements or financial claims detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://abtloman.com/>

What abtloman.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

abtloman.com is a minimal coming-soon landing page that welcomes visitors, states that the website will launch shortly, and provides contact and subscription forms supported by generic placeholder text. Its apparent purpose is to collect prospective contacts before a fuller website or business offering becomes available.

Scam/Impersonation Risk

The site's visible content does not present a login flow, financial service, transaction mechanism, or explicit brand-impersonation claim. However, this benign and limited page presentation does not offset confirmed external threat detections: the domain is recorded by two blacklist sources, and 12 evaluated detections classified it as malicious. This is a material contradiction to treating the site as suitable for credential submission, account access, or financial interaction. The domain's long registration history is a limited positive signal, but it does not resolve the current reputation finding or independently verify the operator.

EVIDENCE

- Independent threat-intelligence telemetry records 12 malicious detections for the domain and a confirmed blacklist status from two sources.
- The homepage is a “Welcome” / coming-soon page with two forms—contact and subscription—and no login form or hidden sensitive form.
- Domain registration telemetry records 2016-01-13 as the creation date and an age of 10.61 years.

Regulatory Verification Notes

The available page content does not identify a legal entity, licensing authority, registration number, or regulated business status. The operator identity therefore remains unverified, and the site provides insufficient disclosure for a regulated-service assessment. Historical material indicates continuity across the observed period without establishing who operates the site or whether any future service would be authorized. Any third-party reputational information should be treated as a security signal rather than a legal or licensing determination.

EVIDENCE

- The homepage contains only welcome, contact, subscription, and placeholder-text content; no legal, licensing, or corporate disclosure is presented.
- The historical record contains 44 archive snapshots spanning 2018–2025, with 8 years tracked.
- Registration records identify PDR Ltd. d/b/a PublicDomainRegistry.com as registrar, with an expiration date of 2027-01-13.

What to Verify Next

Before any sensitive interaction, an independent check should confirm the operator's legal identity and, if the planned service is regulated, confirm the relevant authorization directly with the applicable regulator. Official contact channels should be validated through an independent source rather than relying solely on the landing page, and any future account, payment, or application workflow should be reassessed after the site publishes substantive business and legal information.

EVIDENCE

- Relevant regulator registry: independently match the proposed operator and service against the applicable authorization records.
- Independent business records: confirm that the entity named in any later legal or terms page exists and is responsible for the domain.
- Official contact verification: confirm contact channels through an independently sourced corporate or regulatory reference.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external malicious detections and blacklist status despite the homepage's currently limited functionality. The operator's identity is not independently verified, so the site should not be treated as an established or trusted service for sensitive interaction.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF, resolving to a likely origin on Unified Layer infrastructure in the United States. This provides less intermediary protection than a mainstream edge-delivery configuration and is only a mitigating technical observation, not evidence of legitimacy.

EVIDENCE

- Served from AS46606, Unified Layer, US; the resolved address is 208.91.198.178.
- No CDN was detected; infrastructure analysis identified one likely origin IP and zero edge IPs.
- TLS uses a DV certificate issued by YR1, valid to 2026-11-15T17:42:38+00:00.

Closing Assessment

The site should be limited to passive observation unless and until its external reputation is resolved and its operator, legal status, and intended business purpose are independently confirmed. Credentials, account access, payment details, and other sensitive actions should not be used on the site in its current state.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of abtloman.com.

- The request stayed on abtloman.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The registration is paid up to 2027-01-13. NOTED
- The earliest public archive of this site is from 2018-02-03. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about abtloman.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
