

Is acamdoze.com.br a scam? TrustSniffer's high-risk assessment: 0/100

acamdoze.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

acamdoze.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking association site (Acamdoze) in Portuguese with accessibility options, cookie details, news, transparency documents, contact info and listings of member municipal chambers. No sign of financial products, login credential harvesting, or crypto services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What acamdoze.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Acamdoze is a Portuguese-language public association and institutional portal presenting accessibility features, cookie information, news, transparency documents, contact details, and listings for member municipal chambers; its apparent purpose is informational rather than commercial, with no evident monetization or financial-service offering.

Scam/Impersonation Risk

Contradictory external security signals establish a critical risk posture despite the site's institutional appearance and benign visible functionality. Threat intelligence identified 17 malicious detections and a confirmed blacklist status across external sources, including Tier-1 detections, while the page itself showed no login form, sensitive data-collection form, credential-harvesting mechanism, or crypto-related functionality. The site's apparent association identity therefore cannot be treated as independently established, and the absence of visible phishing mechanics does not neutralize the external reputation evidence. No identity contradiction between distinct legal-entity names was observed on the available pages.

EVIDENCE

- The homepage presents Acamdoze as an association portal with municipal-chamber listings, public notices, transparency material, and contact information rather than a financial or credential-based service.
- The domain registration record shows creation on 2025-07-02, with an age of approximately 1.14 years.
- Historical archive data records 93 snapshots spanning 2007-10-20 through 2026-01-17, covering 20 tracked years; this historical coverage does not independently establish the current operator's identity.
- External security assessment recorded 17 malicious detections and a confirmed blacklist status, with Tier-1 threat detection reported.

Regulatory Verification Notes

The website contains transparency-related documents, institutional information, and municipal-member references, but the available material does not independently verify the real-world operator or establish any regulatory status. No financial licence or licence number is claimed on the reviewed pages; for an informational association portal this may not be applicable, but it remains a disclosure point requiring confirmation if the site is being relied upon for official institutional dealings. The domain record names ASSOCIACAO DE CAMARAS MUN DA MICRO REGIAO DOZE, while identity verification remains unverified; the registration name should therefore be treated as an attribution signal, not proof of control. Transport security is present, but a Domain Validation certificate confirms encryption only and not organisational legitimacy.

EVIDENCE

- The homepage and transparency area provide institutional documents, public information, and member municipal-chamber listings.
- The hosting record identifies AS275714, operated as E-Consulters Enterprise LTDA, BR.
- The site's TLS certificate is issued by YE2, uses Domain Validation (DV), and is valid until 2026-11-08.
- The reviewed institutional and transparency pages do not display a financial licence or licence number.

What to Verify Next

Before any sensitive interaction, an independent municipal or public-sector contact route should confirm that Acamdoze controls the domain and that the listed chambers recognise the site as official. Any claimed institutional status should be checked against the relevant Brazilian association or public-administration records, and the domain's external security detections should be reviewed for documented remediation before access is expanded beyond passive viewing. Official contact channels should be confirmed through an independently obtained source rather than relying solely on information presented by the site.

EVIDENCE

- The homepage supplies the association name, member-chamber references, contact information, and transparency material to use as subjects for independent confirmation.
- Identity verification is currently unverified, so the site's institutional claims require external corroboration.
- External security findings include a confirmed blacklist status and multiple malicious detections requiring remediation evidence.

Summary Verdict

The overall posture is critical, with sensitive interaction risk materially outweighing the site's institutional presentation and low-risk page behavior. The website may appear to be a legitimate public association portal, but available evidence does not establish that the current domain is safe or that its operator is independently verified.

Infrastructure Integrity

The site has no detected CDN or WAF and resolves to one likely origin IP, creating a direct hosting exposure rather than an edge-protected delivery model. The infrastructure is associated with AS275714 and a French-registered network location, while the provider record identifies E-Consulters Enterprise LTDA, BR; this infrastructure context is a mitigating technical detail only and does not offset the external security findings.

Closing Assessment

Access should remain limited to passive viewing until the domain's external detections are resolved and the association's control of the domain is independently confirmed; login, credential submission, and financial activity should not be undertaken.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [acamdoze.com.br](#).

- The request stayed on [acamdoze.com.br](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [com.br](#), across 2 name servers. NOTED
- The registration is paid up to 2027-07-02. NOTED
- The earliest public archive of this site is from 2007-10-20. CLEAR
- It is hosted on AS275714, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [acamdoze.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
