Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is Acapulco, a Serbian travel-agency platform presenting holiday packages, destination listings, European trips, and booking inquiries for personalized offers. Its apparent business model is the sale or arrangement of packaged holidays and related travel services, supported by listings from multiple tour operators.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting legal-identity signals were observed. The homepage has substantive tourism content, including a stated catalogue of more than 5,300 offers from 25 organizers, destination-specific package listings, and a contact-inquiry process rather than a login or credential-collection form. Dynamic page changes and limited browser-side anomalies were observed during interaction, but they were not accompanied by hidden forms, password capture, cloaking, wallet activity, suspicious scripts, or non-whitelisted external posts; in context, they are more consistent with a dynamic catalogue interface than an abuse pattern. The available evidence is therefore consistent with an established, apparently legitimate travel website, while independently verifying the real-world operator remains appropriate.

EVIDENCE

- The homepage presents holiday packages, destination categories, organizer-count claims, contact details, and an inquiry form; no page-level red flags were identified.
- Domain registration record: registered 2021-04-22 (~5.33 years old).
- Web-archive record: 73 snapshots spanning 2013–2026 (14 years tracked), with no suspicious repurposing or semantic drift detected.

Regulatory Verification Notes

The site presents itself as a commercial travel agency and provides a Niš business address and telephone contact, while the registration record names Presek doo Nis and lists United Internet d.o.o. as registrar. Those details provide an apparent commercial identity trail, but the operator's real-world identity is not independently verified by the supplied evidence. No travel-sector licence, registration number, or regulatory authority is identified in the available on-page material, so regulatory standing should be treated as an open verification matter rather than as evidence of misconduct. The available third-party broker context contains no match, and external reputation checks identified no malicious or suspicious detections in the evaluated sources.

EVIDENCE

- The homepage lists the physical address “TPC Kalča, I sprat, lok. B-57, Obrenovićeve 46, Niš” and a Serbian telephone contact.
- Registration record: registrar United Internet d.o.o.; registrant name Presek doo Nis; expiration 2027-04-22.
- Hosted on AS24940 (HETZNER-AS - Hetzner Online GmbH, DE).
- TLS certificate: issuer YE1, DV validation, valid to 2026-11-15.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer counterparty should independently confirm that the Acapulco trading name corresponds to the identified Serbian business, check the relevant travel-agency registry for current authorization, obtain written booking, cancellation, refund, and supplier terms, and use payment methods providing appropriate transaction protection. Contact details should also be confirmed through an independent route before material funds or personal information are exchanged.

EVIDENCE

- The homepage provides a physical Niš address and telephone number that can support independent business-identity confirmation.
- The site uses a contact-inquiry workflow for personalized offers, making written confirmation of price, supplier, inclusions, and cancellation terms especially relevant before payment.
- The supplied page analysis identifies the website category as Travel / Booking / Agency and reports no sensitive form, login form, or untrusted form destination.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence consistent with an established, apparently legitimate commercial website and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is not independently verified, so the positive classification should not be interpreted as proof of corporate identity or regulatory authorization.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed edge address associated with AS24940 and Hetzner Online GmbH; the origin server was not observable in the supplied infrastructure analysis. This is a meaningful exposure-mitigation measure, but it is treated as a protective control rather than proof of legitimacy.

Closing Assessment

Normal browsing and ordinary travel-service engagement are proportionate to the assessed posture, subject to routine independent confirmation of merchant identity, contractual terms, and payment protection before credentials or funds are committed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of acapulco.rs.

- The request stayed on acapulco.rs. It was not redirected to another domain. CLEAR
- Registration is published under United Internet d.o.o.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-22. NOTED
- The earliest public archive of this site is from 2013-02-06. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about acapulco.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
