

Is acblog.am safe? TrustSniffer's moderate-trust assessment: 70/100

acblog.am

Verdict

70

OUT OF 100

MODERATE TRUST

acblog.am is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Armenian-language news site focused on anti-corruption reporting, politics and local investigations. Contains article lists, video links, and a login/subscribe form.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What acblog.am served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Armenian-language news and media website presents local reporting on anti-corruption matters, politics, society, investigations, and video coverage. Its apparent business model is advertising- and donation/subscription-supported journalism, with visitors offered article content alongside login and subscription functions.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there is no recorded phishing, brand-impersonation, or malicious-content indicator, and the site’s content is consistent with a local news publisher rather than a deceptive financial or investment service. The homepage contains a login and subscription form, but testing found no hidden forms, external password destinations, wallet activity, clipboard manipulation, or cloaking. Dynamic page changes and console errors were observed during interaction; these are implementation-quality anomalies rather than evidence of impersonation on the available record. The contact-channel integrity anomaly is the publication of `info@example.come`, which contains a deliverability-breaking domain typo or possible typosquat characteristic, but it is not sufficient by itself to establish deceptive intent.

EVIDENCE

- Registration continuity indicates a domain age of 7.94798083504449 years, with historical site observation beginning on 2018-09-08.
- The homepage is categorized as “News / Media” and contains article listings, political and investigative reporting, video links, and no reported content red flags.
- Interaction testing recorded 1,462 maximum DOM changes and 8 console errors, while recording 0 hidden forms, 0 external password forms, 0 wallet-connect runs, and 0 cloaking events.

Regulatory Verification Notes

The site’s apparent media business model does not itself indicate a regulated financial activity. However, the supplied homepage evidence does not present a corporate registration, media license, licensing authority, or registration number, so the operator and applicable legal framework remain verification matters rather than established facts. The available page content also lacks a meta description and structured metadata, and the homepage title contains the spelling “Home - Anti Corruption”; these are transparency and presentation weaknesses, not evidence of a scam. No matching third-party broker record was identified.

EVIDENCE

- The homepage describes advertising, donations, and subscriptions as the apparent monetization channels and provides a login/subscribe function.
- The observed registrar is abcdomain (ABCDomain LLC).
- The site is served on AS13335 by CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-11-05T10:16:06+00:00.

What to Verify Next

Before sensitive or high-value activity, an institution should independently confirm the legal operator behind the publication, establish that any donation or subscription recipient matches that operator, and review the applicable cancellation, refund, and payment-protection terms. Support and social-media channels should be confirmed through independently sourced contact details rather than relying solely on information presented on the site. Any login should be limited to credentials unique to this service.

EVIDENCE

- The homepage exposes login and subscription functionality, making operator and payment-recipient validation relevant before account or payment use.
- The site links to YouTube, Facebook, Instagram, Twitter, and LinkedIn, providing potential independent channels for cross-checking official affiliation.
- The site’s stated activity is local journalism and investigations, not a claimed licensed financial service.

Summary Verdict

The website has a **moderate trust posture** and the available evidence is consistent with an apparently legitimate local-news publication. No active threat or impersonation contradiction was identified, but the real-

world operator identity is only likely rather than independently verified, so the site should not be treated as fully authenticated for sensitive or high-value reliance.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection, which is a mitigating control against direct exposure of the backend but does not independently establish legitimacy. All four observed addresses were CDN edge addresses, and no origin-server candidate was identified during the analysis.

EVIDENCE

- Cloudflare edge infrastructure was observed at 104.21.28.186, 172.67.147.76, 2606:4700:3035::6815:1cba, and 2606:4700:3036::ac43:934c.
- All observed edge addresses map to AS13335; the infrastructure registry is ARIN.
- The observed hosting country is the United States.

Closing Assessment

Proceed with ordinary browsing on a measured basis, while completing independent identity, subscription, and payment-protection checks before submitting sensitive information or committing substantial funds.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of acblog.am.

- The request stayed on acblog.am. It was not redirected to another domain. CLEAR
- Registration is published under abcdomain (ABCDomain LLC). CLEAR
- The earliest public archive of this site is from 2018-09-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about acblog.am at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
