

Is accel.my legit? TrustSniffer's high-trust assessment: 96/100

accel.my

Verdict

96

OUT OF 100

HIGH TRUST

accel.my appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate homepage for ACCEL SYSTEMS SDN BHD describing data-center infrastructure products and services with contact information and a contact form.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the corporate site of Accel Systems Sdn Bhd, presenting itself as a provider of data-center critical-infrastructure solutions for enterprise and small-business environments. Its stated business model is B2B delivery of equipment, installation, maintenance, training, and project services covering UPS and M&E works, rack systems, physical security, cooling, power distribution, environmental monitoring, DCIM, structured cabling, cable management, and cloud computing.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The homepage presents a coherent corporate-services profile, identifies Accel Systems Sdn Bhd, and provides a conventional contact form rather than a login, payment, wallet-connection, or credential-collection interface. Automated interaction did produce limited non-whitelisted external requests and a measurable DOM change, but the same testing found no hidden forms, password-exfiltration forms, cloaking, wallet activity, clipboard manipulation, or suspicious inline scripts; these observations therefore do not establish an abuse pattern. The apparent alignment between the public company name and the recorded domain organisation supports provenance, while independent operator verification remains incomplete.

EVIDENCE

- The homepage identifies “ACCEL SYSTEMS SDN BHD” and describes data-center infrastructure services, with no detected phishing or brand-impersonation indicators.
- The homepage contains one contact form and no login or sensitive form; browser testing recorded zero wallet-connect, wallet-drainer, clipboard-hijack, hidden-form, or external password-form events.
- Domain registration evidence: created 2013-02-05 and aged 13.55 years; archived coverage is recorded from 2017-05-28 through 2025-03-26 across 9 tracked years.

Regulatory Verification Notes

The site’s stated activities are commercial data-center infrastructure services rather than a financial product or investment offering. The available content does not present a licence claim, licence number, or regulatory authority, so any sector-specific registration or licensing requirement is not established by the site and should be treated as a transparency item rather than evidence of misconduct. The domain records associate Accel Systems Sdn Bhd with the registration and list Acme Commerce Sdn Bhd as registrar; this is consistent with the site’s apparent corporate identity but does not independently prove the real-world operator. No matching broker warning was identified in the available third-party context.

EVIDENCE

- The homepage describes B2B infrastructure products and services, including UPS, cooling, cabling, DCIM, cloud solutions, installation, maintenance, and training.
- Registration records list “Accel Systems Sdn Bhd” as the organisation and “Acme Commerce Sdn Bhd” as registrar.
- The site’s transport encryption uses a DV certificate issued by YR2, valid through 2026-10-11.
- The hosting record identifies AS38182, operated by Extreme Broadband – Total Broadband Experience, MY.

What to Verify Next

Before a procurement, payment, or contractual engagement, the prospective counterparty should independently confirm Accel Systems Sdn Bhd through the relevant Malaysian corporate registry and establish which, if any, technical, construction, facilities-management, or subcontractor licences apply to the proposed work. Commercial checks should confirm the contracting entity, quotation and invoice details, warranty and maintenance commitments, references for comparable data-center projects, and payment protections. Official contact channels should also be confirmed through an independently sourced corporate record before exchanging sensitive procurement or account information.

EVIDENCE

- The homepage supplies a corporate description and contact form but does not state a licence authority or licence number.
- The stated service model involves installations, maintenance, training, and project engagements, making contracting-entity and service-scope checks material.
- The site is served over a valid DV TLS certificate, supporting secure transport for ordinary communications but not independently validating corporate authority.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate, low-risk corporate website. Its coherent service presentation, long-running domain registration, stable technical operation, and absence of contradictory threat indicators support a high-trust posture. The website should not, however, be treated as independent proof of the real-world operator's identity.

Infrastructure Integrity

The site resolves directly to one identified address on AS38182, operated by Extreme Broadband – Total Broadband Experience, MY, with no CDN or WAF detected and no separate edge-IP layer observed. This is a straightforward hosting arrangement; the presence of identifiable hosting infrastructure is a modest technical consistency signal, but hosting alone does not establish legitimacy.

Closing Assessment

Ordinary browsing and business enquiry are proportionate; credential or payment interactions should follow the standard independent counterparty, contractual, and payment-protection checks appropriate to a B2B supplier.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of accel.my.

- The request stayed on accel.my. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Acme Commerce Sdn Bhd. [CLEAR](#)

- DNS for this domain is served by dnshostmaster.net, across 2 name servers. NOTED
- The registration is paid up to 2027-02-05. NOTED
- The earliest public archive of this site is from 2017-05-28. CLEAR
- It is hosted on EXTREMEBB-AS-MY, from a server in MY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about accel.my at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
