Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as a Finland-focused Accenture corporate site offering professional consulting, technology, managed-services, research, sustainability, industry, and careers information, with a business model based on client engagements rather than direct consumer sales.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence contains no phishing, impersonation, blacklist, malicious-reputation, or conflicting-identity indicators. The site's corporate presentation, established historical continuity, and clean external reputation are mutually consistent with an established website. Minor technical observations, including two suspicious inline-script flags, some external request activity, and absent SEO metadata or structured data, are implementation or presentation issues rather than evidence of deception; the inspection found no hidden forms, cloaking, wallet activity, or untrusted form destinations.

EVIDENCE

- The country-page capture presents corporate services, research, careers, locations, investor relations, and contact navigation, with no phishing or brand-impersonation indicators.
- Independent reputation checks recorded 0 malicious detections, 0 suspicious detections, and a global traffic rank of 2418.
- The domain was registered on 2000-08-29 and is approximately 25.97 years old; archived records contain 1187 snapshots spanning 2000–2022, covering 23 tracked years.
- Behavioral inspection recorded 2 successful runs, 2 suspicious inline scripts, 0 hidden forms, 0 wallet-connect runs, and 0 non-whitelisted external posts.

Regulatory Verification Notes

The available material describes a corporate professional-services business, not a consumer financial product or a site making a regulated-investment offering. No financial license or registration number is presented in the supplied page content, so regulatory applicability and any required local registration remain matters for ordinary counterparty verification rather than indicators of a scam. The site's apparent corporate identity is evidence-consistent, but the real-world operator identity is not independently verified. No broker-dataset match was identified.

EVIDENCE

- The country and corporate navigation identify consulting capabilities, managed services, industries, research, investor relations, and careers; no regulated-product authorization is stated in the supplied content.
- Domain registration is recorded through CSC Corporate Domains, Inc.
- The site is served from AS3573, ACCENTURE - Accenture LLP, US.
- The site's TLS certificate is issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1, uses OV validation, and is valid through 2027-01-29.

What to Verify Next

Before credential or payment interactions, an enterprise counterparty should independently confirm the contracting entity through an offline or independently sourced corporate channel, review the applicable contractual and return or cancellation terms, and confirm available payment protections. Where a proposed engagement involves a regulated service or jurisdiction-specific activity, the relevant registry should be checked for the specific legal entity and service scope. Contact channels should be validated independently rather than relying solely on links reached through the initial page.

EVIDENCE

- The site navigation includes "Contact Us," "Locations," "Media & Investors," and "Careers" routes that can be compared with independently sourced corporate contact details.
- The captured page includes cookie-consent and analytics disclosures, providing a basis for reviewing the site's privacy and tracking notices before interaction.
- The available material identifies a corporate-services model, so any proposed transaction should be matched to a written engagement, identifiable contracting entity, and applicable payment terms.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate corporate website. The classification supports normal browsing and ordinary business interaction, while the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The hosting and transport profile is consistent with commercially operated infrastructure and provides a useful mitigating signal for service integrity. That infrastructure signal should not be treated as standalone proof of corporate identity.

Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent counterparty, contractual, and payment-protection checks completed before credentials or payments are submitted.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [accenture.com](#).

- The request stayed on [accenture.com](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under CSC Corporate Domains, Inc.. [CLEAR](#)
- DNS for this domain is served by [accenture.com](#), across 5 name servers. [NOTED](#)
- The registration is paid up to 2026-08-29. [NOTED](#)
- The earliest public archive of this site is from 2000-12-04. [CLEAR](#)
- It is hosted on ACCENTURE, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about accenture.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
