Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a parked domain landing page for aceonessoftwares.com, presenting a Hostinger domain-registration notice and promotional links for web hosting, AI-assisted website building, VPS hosting, domain search, and business email rather than an operating software business or customer-facing service.

Scam/Impersonation Risk

External security intelligence identifies a **confirmed blacklist condition**, including multiple malicious detections and a further suspicious classification from security providers. This is a material contradiction that outweighs the otherwise benign appearance of the parked homepage. No brand impersonation or conflicting legal-entity names were observed, but the domain-level blacklist finding is sufficient to create a critical risk posture for sensitive interaction. Separate abuse reports concern the shared hosting address rather than being uniquely attributed to this domain; that attribution limits their specificity but does not remove the broader external threat signal.

EVIDENCE

- The domain was classified as blacklisted by two external sources, with 11 malicious and 1 suspicious security detections.
- The site's hosting address, 2.57.91.91, has 27 abuse reports; the reports are attributed to shared Hostinger infrastructure.
- The homepage is a parked-domain landing page with no detected brand-impersonation content, login prompt, or sensitive form.

Regulatory Verification Notes

The available homepage does not identify an operating company, responsible legal entity, licensing authority, or registration number. Its content is limited to a domain-registration notice and Hostinger product promotions, so the apparent business purpose of the domain cannot be connected independently to a real-world operator. The domain's registration history is established, but that administrative fact does not verify ownership or legitimacy. Transport security and identifiable hosting are technical controls only; they do not substitute for legal-entity or regulatory verification.

EVIDENCE

- WHOIS records show registration on 2020-04-30T22:34:41Z, an age of 6.31 years, and expiry on 2027-04-30T22:34:41Z.
- Archive records contain 14 snapshots spanning 2021–2025, with first observation on 2021-02-20 and last observation on 2025-10-10.
- The site's transport encryption uses a DV TLS certificate issued by YE2, valid through 2026-10-25T08:06:36+00:00.
- Hosting telemetry identifies AS47583, AS-HOSTINGER - Hostinger International Limited, CY.

What to Verify Next

Before any sensitive interaction, an institution should establish the responsible operator through an independently sourced corporate registry, confirm any applicable authorization directly with the relevant regulator, and validate official contact channels through an offline or independently obtained route. Enterprise controls should also require a fresh security review if the domain later changes from a parked landing page to a login, download, payment, or account-management service.

EVIDENCE

- The homepage currently contains no login form, password field, payment form, or other sensitive-input mechanism.
- The page presents only Hostinger-managed commercial links for hosting, website building, VPS, domain search, and email.
- No legal, licensing, or operator-identification page is available in the supplied site content.

Summary Verdict

The website has a **critical trust posture** and should not be treated as an established operating business or a verified service provider. The available evidence supports only limited, non-sensitive observation of the parked page; sensitive interaction risk remains unacceptable.

Infrastructure Integrity

The site resolves to one likely origin address, with no detected CDN or WAF edge layer and no protective intermediary identified between the visitor and the hosting endpoint. The infrastructure is operational and attributable to Hostinger, but that hosting arrangement is a mitigating technical fact only and provides no assurance about the domain operator.

Closing Assessment

Sensitive use should be withheld unless independent operator, regulatory, and security checks produce clear, corroborated results.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 27 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 33% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aceonessoftwares.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
