

Is acerto.com.br legit? TrustSniffer's high-trust assessment: 90/100

acerto.com.br

Verdict

90

OUT OF 100

HIGH TRUST

acerto.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate site for Acerto, a Brazilian debt negotiation service offering CPF consultation, discounts up to 99%, partner integrations with banks and retailers, FAQs, testimonials, and a digital-only support flow. The page describes how to check debts, register, and generate payment slips.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Acerto.com.br is a Brazilian digital debt-negotiation service that allows visitors to consult CPF-linked debts, review creditor offers, negotiate repayment terms, and generate payment slips, presenting a consumer-focused model built around online settlement and partner creditor integrations.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent debt-resolution workflow, including free CPF consultation, discounts of up to 99%, selectable repayment conditions, creditor offers, and boleto generation. These are consequential financial functions, but the observed form and browser behavior did not show hidden forms, external submission destinations, cloaking, wallet activity, or suspicious network activity. The site's established registration record and clean external reputation further support an apparently legitimate service, while not independently proving the real-world operator's identity.

EVIDENCE

- Domain registration record: Registered 2019 (~7.15 years old).
- Homepage: Presents Acerto as a debt-negotiation service with creditor offers, CPF consultation, repayment arrangements, and payment-slip generation.
- Observed browser behavior: 2 successful runs; 0 external XHR requests, 0 non-whitelisted external posts, 0 hidden forms, and no detected phishing or brand-impersonation behavior.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or Google Safe Browsing hit.

Regulatory Verification Notes

The site provides substantial customer-facing information, including corporate, partner, security, help, and contact content, but the supplied material does not establish an independently verified regulated-entity status or identify a verified licensing authority and license number. That is a regulatory-disclosure matter rather than evidence of a scam. The available technical identity artifacts name Banco Inter S.A. in the domain registration record and Acerto Cobranca e Informacoes Cadastrais S.A. in the transport certificate; these support an identifiable institutional context but do not, by themselves, verify the operator relationship. The service should therefore be regarded as apparently legitimate with identity and regulatory status requiring ordinary independent confirmation.

EVIDENCE

- Domain registration record: Owner listed as BANCO INTER S.A.; creation date 2019-06-21 and expiration date 2027-06-21.
- Transport encryption: OV TLS certificate issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 for Acerto Cobranca e Informacoes Cadastrais S.A., valid to 2027-02-13T23:59:59+00:00.
- Homepage and corporate content: Includes About, Careers, Partners, Security, Blog, Help, and contact/address information.
- Site disclosure review: No license claim, licensing authority, or license number was identified in the supplied content.

What to Verify Next

Before credential or payment interactions, independently confirm the legal merchant identity and the relationship between the service, the named creditor, and the payment beneficiary. Confirm any applicable consumer-finance authorization with the relevant Brazilian registry, and review the applicable payment-protection, cancellation, and dispute provisions through an independent channel.

EVIDENCE

- The service handles CPF-related debt inquiries and payment arrangements, making independent beneficiary confirmation material before settlement.
- The supplied content identifies partner creditors and support resources but does not independently verify licensing or operator relationships.
- The site offers digital-only support, so an independently obtained contact route should be used for material account or payment issues.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. No scam or impersonation contradiction was identified. The classification supports normal site interaction, subject to the unresolved distinction between apparent site legitimacy and independently verified operator identity.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers and no origin candidate identified in the analysis. This architecture mitigates direct origin exposure and is a positive resilience signal, but it is supportive infrastructure rather than proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the observed posture, while independent merchant-identity, payment-protection, and applicable regulatory checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of acerto.com.br.

- The request stayed on acerto.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by akamai.net, across 6 name servers. NOTED
- The registration is paid up to 2027-06-21. NOTED
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about acerto.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
