

Is acicagliari.it a scam? TrustSniffer's high-risk assessment: 0/100

acicagliari.it

Verdict

0

OUT OF 100

CRITICAL RISK

acicagliari.it shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple parked/under-construction page showing only the domain and 'Under Construction' text. No links, forms, or contact information present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

www.acicagliari.it
Under Construction

What acicagliari.it served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a parked, under-construction domain that displays only its domain name and an “Under Construction” notice. It presents no identifiable service, product, transaction flow, or operating purpose to visitors, so its intended business model cannot be established from the observed page.

Scam/Impersonation Risk

The site carries a **critical interaction risk** because external security intelligence has classified the domain as malicious and the domain is confirmed on blacklist sources. Multiple security detections, including findings associated with Fortinet and Sophos, materially outweigh the otherwise inactive appearance of the page. The homepage itself does not show a login, payment mechanism, download, contact channel, or brand-impersonation content; however, the absence of an active interaction surface does not resolve the external reputation contradiction. No conflicting legal-entity names or direct brand-impersonation indicators were observed.

EVIDENCE

- External reputation telemetry recorded 7 malicious detections, with Fortinet and Sophos among the flagged vendors.
- The domain is confirmed on external blacklist sources; Google Safe Browsing was not flagged.
- The homepage contains only the domain name and “Under Construction,” with no links, forms, or contact information.
- The domain was registered on 2023-09-20 and is recorded as approximately 2.92 years old.

Regulatory Verification Notes

The observed page provides no legal, corporate, licensing, or regulatory disclosure and contains no linked identity or terms material. This is a verification gap rather than a standalone conclusion of fraud, but it prevents independent confirmation of the operator’s status. The registration record associates the domain with Federica Loi and Azione Cattolica Italiana Diocesi di Cagliari; that association remains unverified as the real-world operator of the website. A third-party broker dataset produced no matching broker record, which is contextual only and does not establish regulatory standing.

EVIDENCE

- The homepage has no visible legal notice, company presentation, license number, registration number, or terms link.
- TLS is provided at DV validation level by Actalis Domain Validation Server CA G3, valid through 2027-03-30.
- The domain’s archive record contains 84 snapshots spanning 2004–2026, covering 23 years of tracked history.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm whether the domain is currently authorized by the named organization through an offline or independently sourced contact route, and should verify any claimed legal or regulated status directly with the relevant official registry. The domain should not be used for credential submission, financial activity, software acquisition, or downloads unless those checks resolve the external reputation findings and establish a verified operator.

EVIDENCE

- The observed page provides no official contact route through which the operator can be independently authenticated.
- No licensing authority, license number, or regulated-service claim is presented on the observed page.
- The available identity association is not independently verified.

Summary Verdict

The website should be treated as an untrusted and unsuitable destination for sensitive interaction. Its inactive presentation does not compensate for confirmed blacklist status and multiple malicious security detections. The operator identity and intended purpose also remain unverified.

Infrastructure Integrity

The domain resolves directly through Aruba S.p.A. infrastructure in Italy, identified as AS31034, without a detected CDN or WAF layer and with origin candidates visible in the observed resolution. This provides no meaningful protective mitigation against the external reputation findings. The transport layer uses a valid DV certificate issued by Actalis Domain Validation Server CA G3, which confirms encrypted delivery but does not establish legitimacy.

Closing Assessment

Access should be limited to passive observation, with credentials, financial information, downloads, and other sensitive actions withheld unless independent identity and reputation checks produce a clear resolution.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of acicagliari.it.

- The request stayed on acicagliari.it. It was not redirected to another domain. CLEAR
- Registration is published under Aruba s.p.a.. CLEAR
- DNS for this domain is served by arubadns.cz. NOTED

- The registration is paid up to 2026-09-20. NOTED
- The earliest public archive of this site is from 2004-03-19. CLEAR
- It is hosted on ARUBA-ASN, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about acicagliari.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
