

# Is acipcdl.com.br safe? TrustSniffer's low-trust assessment: 40/100

acipcdl.com.br

## Verdict

40

OUT OF 100

LOW TRUST

acipcdl.com.br is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-seeming website for ACIP/CDL (Associação Comercial e Industrial de Ponte Nova) offering membership information, services for businesses, news, events, and contact details. No signs of credential harvesting or financial-investment solicitation in the provided content.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

https://www.acipcdl.com.br/

What acipcdl.com.br served when TrustSniffer captured it on 2026-08-22. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

This website presents itself as the online presence of ACIP/CDL, Associação Comercial e Industrial de Ponte Nova, a local business and trade association offering membership benefits, business services, certificates, telemedicine, talent-bank services, discounts, events, news, and institutional information.

### Scam/Impersonation Risk

The site's visible content is consistent with a local trade-association model and does not show credential-harvesting forms, investment solicitation, cryptocurrency functions, or apparent brand impersonation. However, this benign presentation is materially outweighed by confirmed external reputation contradictions: four malicious detections were recorded and the domain is blacklisted by two external sources. The site therefore presents a high risk for sensitive interactions despite its established institutional appearance and apparently legitimate business purpose.

#### EVIDENCE

- The homepage identifies ACIP/CDL and presents membership, business-support services, news, events, and institutional navigation rather than financial-investment offers.
- External reputation assessment recorded 4 malicious detections from 58 harmless and 32 undetected results, with the domain evaluated as blacklisted by 2 sources.
- The domain was registered on 2000-09-18 and is approximately 25.94 years old.
- Historical records contain 192 archive snapshots spanning 2001–2025, with 25 years tracked.

### Regulatory Verification Notes

The institutional sections provide a substantive governance framework, including pages for the directorate, mission, vision and values, Estatuto ACIP, Estatuto CDL, and the national SPC Brasil regulation. The site presents an apparent association identity, but the available evidence does not independently verify the real-world operator. No regulatory licence or licence number is claimed on the reviewed pages; for a trade association, this is a disclosure and scope-verification matter rather than standalone evidence of fraud. The long registration history, sustained historical presence, and valid transport encryption are positive infrastructure and provenance signals, but they do not neutralize the external threat findings.

#### EVIDENCE

- The “Diretoria,” “Missão, Visão e Valores,” “Estatuto ACIP,” and “Estatuto CDL” pages provide the site's principal institutional and governance disclosures.
- The site does not claim a regulatory licence or display a licence number on the reviewed business and institutional pages.
- Hosting is identified as AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is DV-validated, issued by WE1, and valid to 2026-09-26.

### What to Verify Next

Before any login, credential submission, membership payment, document upload, or other sensitive action, the association's legal existence and current contact channels should be confirmed through an independent offline or authoritative source. The statutory and directorate information should be matched against the relevant Brazilian business or civil-association records, and any payment request should be validated directly with the association using contact details obtained independently of the website.

#### EVIDENCE

- The “Seja um Associado” and membership-related pages define the commercial relationship that should be confirmed before payment.
- The “Estatuto ACIP,” “Estatuto CDL,” and “Diretoria” pages provide the names and governance material to reconcile against authoritative records.
- The contact page publishes telephone numbers, office hours, and social-channel references that can be cross-checked through an independent route.

Summary Verdict

The overall posture is **low trust**, with sensitive interaction risk driven by confirmed external reputation contradictions. The site's apparent trade-association purpose and substantial institutional content do not establish that sensitive engagement is safe or that the operator's identity is independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were Cloudflare edge servers rather than a directly exposed origin. This reduces direct origin exposure and is a mitigating technical control, but CDN protection is not evidence that the site itself is legitimate and cannot offset the external reputation concerns.

Closing Assessment

The appropriate disposition is to restrict activity to passive review until the association, its contact channels, and any requested transaction or credential flow have been independently confirmed.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

  - The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE
- 02 Sensitive Interaction Risk

  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
  - The structure of the page changed sharply while it was loading.  
Behaviour in a sandbox rule:BEHAV\_DOM\_DENSITY\_SPIKE
  - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.  
Behaviour in a sandbox rule:BEHAV\_DOM\_DIFF\_AFTER\_INTERACTION

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 79/100 |
| Identity verification confidence | 78%    |

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of acipcdl.com.br.

- The request stayed on acipcdl.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-18. NOTED
- The earliest public archive of this site is from 2001-04-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about acipcdl.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
