

Is acronis.com legit? TrustSniffer's high-trust assessment: 90/100

acronis.com

Verdict

90

OUT OF 100

HIGH TRUST

acronis.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official Acronis corporate product page describing an AI-native cybersecurity and data protection platform, enterprise features, service provider offerings, case studies, and links to trials, demos, and contact channels.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Acronis.com is the corporate product website for Acronis, presenting an AI-powered cybersecurity, data protection, backup, disaster recovery, and IT-automation platform for businesses and service providers; its apparent business model is the sale of enterprise software subscriptions, licenses, trials, demos, and related professional services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate and product-marketing model, with consistent Acronis branding, enterprise cybersecurity offerings, case studies, regional navigation, and standard contact, trial, and demonstration pathways. No phishing, brand-impersonation, malicious-content, or wallet-related behavior was identified. A behavioral review did flag four suspicious inline scripts and two console errors, but the same review found no hidden forms, external password submission, cloaking, wallet activity, clipboard manipulation, or drainer behavior; this is therefore a limited technical anomaly rather than evidence of impersonation. The site's long registration continuity, substantial historical presence, clean external reputation, and strong public reach materially support an apparently established provenance.

EVIDENCE

- The homepage was first captured on 2001-05-15 and last captured on 2023-04-19, with 3,217 snapshots across 23 tracked years.
- The domain registration record shows creation on 2001-01-09 and an age of 25.61 years.
- External checks recorded 0 malicious detections, 0 suspicious detections, and a global traffic rank of 1991; no phishing or brand-impersonation finding was recorded.
- The behavioral review recorded 4 suspicious inline scripts and 2 console errors, while recording 0 hidden forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 clipboard-write events.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate enterprise software website, but the real-world operator identity is not independently verified by this assessment. The page clearly describes commercial cybersecurity and data-protection services, yet the supplied evidence does not establish a regulated financial or other third-party license, and the on-page disclosure position is unclear; this is a transparency and verification matter rather than evidence of a scam. Registration through GoDaddy.com, LLC, a valid Organisation Validation certificate naming Acronis International GmbH, and established technical continuity

provide affirmative legitimacy support. The registration record's privacy service is an administrative limitation and does not constitute an identity contradiction. No matching adverse broker-reputation signal was identified.

EVIDENCE

- The homepage identifies an enterprise software business offering cybersecurity, backup, disaster recovery, endpoint protection, and IT-automation products to businesses and service providers.
- The domain is registered through GoDaddy.com, LLC; the record shows creation date 2001-01-09 and expiration date 2034-01-09.
- Served through AS13335 (CLOUDFLARENET - Cloudflare, Inc.); the infrastructure record also identifies AS396982 (GOOGLE-CLOUD-PLATFORM - Google LLC, US).
- TLS uses DigiCert Global G2 TLS RSA SHA256 2020 CA1 with OV validation, subject organisation Acronis International GmbH, valid to 2026-12-01.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the contracting Acronis entity, applicable subscription terms, cancellation and refund conditions, and the payment-protection arrangements associated with the proposed purchase. Licensing verification should be tailored to the specific service and jurisdiction rather than inferred from the site's cybersecurity branding. Contact channels should also be cross-checked through an independently sourced corporate route before sensitive account or commercial information is exchanged.

EVIDENCE

- The homepage provides separate navigation for Products, Solutions, Pricing, Partners, Support & Resources, Contact Sales, and Contact Support.
- The page includes a login link and a contact-sales form placeholder, but no sensitive form submission was detected during the observed interaction.
- The site links to established social platforms including LinkedIn, YouTube, Facebook, X/Twitter, and Reddit, providing channels for independent cross-checking.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established corporate website and no observed scam or impersonation contradictions. Legitimacy is apparent rather than proven because independent real-world operator verification remains incomplete.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating layer against direct exposure of service infrastructure, while the observed Google Cloud hosting environment is consistent with mainstream enterprise web delivery. Protective infrastructure supports resilience and reduces exposure but is not, by itself, proof of corporate legitimacy.

Closing Assessment

Ordinary browsing and standard business engagement are proportionate to the assessed posture, subject to independent checks of the contracting entity, commercial terms, and payment protections before credentials or

payment details are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of acronis.com.

- The request stayed on acronis.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-13.org, across 4 name servers. NOTED
- The registration is paid up to 2034-01-09. CLEAR
- The earliest public archive of this site is from 2001-05-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about acronis.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
