

Is actionpay.com.br legit? TrustSniffer's high-trust assessment: 90/100

actionpay.com.br

Verdict

90

OUT OF 100

HIGH TRUST

actionpay.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Actionpay Brazil presents itself as the Brazilian office of a global CPA performance-marketing network serving advertisers and publishers across several commercial verticals. The page includes company information, affiliate payout rankings, client and contact sections, signup links, and standard password, personal-code, and 2FA account authentication interfaces.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Brazilian corporate portal of Actionpay, a CPA performance-marketing network that connects advertisers with publishers and compensates publishers for attributable conversions across sectors including finance, e-commerce, education, travel, mobile applications, and online gaming.

Scam/Impersonation Risk

No phishing, impersonation, conflicting legal identity, malicious redirection, or other identity contradiction was observed. The account-authentication functions are consistent with the portal's stated role and showed no untrusted form destinations or credential transmission to external forms. Published affiliate rankings and unpopulated performance counters are not independently substantiated by the supplied pages, but they do not outweigh the site's longstanding provenance, coherent business presentation, and clean threat reputation.

- The homepage displays ranked publisher payouts in Brazilian reais while its general traffic, product, advertiser, action, visitor, and promotional-code counters remain at zero.
- The account interface contains password, personal-code, and two-factor authentication workflows; testing identified no external password forms, cloaking, suspicious scripts, clipboard hijacking, or cryptocurrency-wallet activity.
- The domain was registered on 4 April 2012 and is approximately 14.33 years old; the registration is valid through 4 April 2028.
- Web archives contain 42 snapshots spanning 3 March 2024 to 7 June 2026, covering 3 tracked years, with no detected repurposing or semantic drift.

Regulatory Verification Notes

The supplied corporate page identifies Actionpay Brazil as a Rio de Janeiro office established during the network's Latin American expansion and describes its advertiser–publisher marketplace clearly. It references privacy and terms materials, but the available content does not establish a specific corporate registration or regulatory authorization. As CPA affiliate marketing is the stated activity, the absence of a financial-services licence claim is not itself anomalous; any regulated campaigns promoted through the marketplace would require assessment against the rules applicable to those advertisers and products. No relevant adverse broker-reputation match was found.

- The About Us section states that Actionpay Brazil began operating in early 2014 as part of Actionpay's global expansion into Latin America.
- The domain-registration record names “Adonweb Brasil marketing de rede LTDA” as the owner.

- The site is served from AS39572 by ADVANCEDHOSTERS-AS / DataWeb Global Group B.V. in the Netherlands.
- The site's transport encryption uses a YR2-issued domain-validated certificate, valid until 23 September 2026.

What to Verify Next

Enterprise onboarding should confirm the contracting entity’s current registration, authorized representatives, physical business details, and relationship to the Actionpay brand through official corporate records. Commercial due diligence should also reconcile payout terms, attribution rules, dispute procedures, privacy obligations, and advertiser-screening controls with the executed agreement. Official support and contact channels should be confirmed through an independent corporate route before establishing privileged administrative access or payment instructions.

- The homepage provides separate advertiser and publisher enrollment paths, indicating distinct contractual roles requiring role-specific terms.
- The site presents client and contact sections alongside privacy and terms references, providing the starting points for documentary due diligence.
- The stated marketplace spans several commercial verticals, including banks and finance and online games, for which campaign-level compliance requirements may differ.
- The portal supports standard login, personal-code, and two-factor authentication, making administrator authorization and access-control ownership relevant onboarding checks.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate portal. Longstanding provenance, coherent commercial identity, stable observed behavior, meaningful web visibility, and clean external threat intelligence converge on a high-confidence assessment with no contradictory risk signals. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

The site resolves directly to one likely origin address and does not use a detected CDN or WAF edge layer. Its identified professional hosting environment, valid encrypted transport, and absence of reported abuse provide sound operational assurance, although direct origin exposure offers less network-layer shielding than a managed edge service and is not independently proof of legitimacy.

Closing Assessment

Prospective users may engage with the platform normally, subject to standard corporate onboarding, contractual review, and payment-control procedures appropriate to an affiliate marketplace.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of actionpay.com.br.

- The request stayed on actionpay.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by pub-ns.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-04-04. [CLEAR](#)
- The earliest public archive of this site is from 2024-03-03. [CLEAR](#)
- It is hosted on ADVANCEDHOSTERS-AS, from a server in NL. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about actionpay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
