

Is acupressureexpert.in a scam? TrustSniffer's high-risk assessment:
0/100

acupressureexpert.in

Verdict

0

OUT OF 100

CRITICAL RISK

acupressureexpert.in shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Launching Soon' landing page for acupressureexpert.in that asks visitors to provide name and email to receive updates. Includes cookie notice and Google reCAPTCHA protection. No commerce, login, or financial activity present.

Evidence status and limitations

Evidence completeness: UNKNOWN

The real-world operator identity was not independently verified.

Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://acupressureexpert.in/>

What acupressureexpert.in served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2022.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

What appears on the website is a minimal “Launching Soon” landing page for acupressureexpert.in, presenting a contact form that requests a name and email address for updates, promotions, and other announcements. Its apparent purpose is basic lead capture before a future launch; no commerce, account login, or financial activity is visible.

Scam/Impersonation Risk

The site presents no visible brand impersonation, conflicting legal identities, phishing form, or other page-level scam indicator. However, this benign presentation is outweighed by confirmed domain-level blacklist detections, including multiple malicious assessments and an active external threat signal. The available reputation evidence therefore creates a material risk for sensitive interaction even though the current page exposes only a limited form. Eight abuse reports also concern an Amazon Technologies Inc. shared-infrastructure IP; that attribution does not independently identify the operator, but it does not offset the separate blacklist findings.

EVIDENCE

- External reputation checks recorded 16 malicious and 1 suspicious detections, with a confirmed blacklist status.
- The homepage is categorized as a “Launching Soon” landing page and contains no login or hidden sensitive form.
- The domain registration record shows 2026-04-15 and an age of 0.35 years; registrar: GoDaddy.com, LLC; registrant organization: funapp.

Regulatory Verification Notes

The landing page does not identify a legal entity, disclose a registration or license number, or establish an independently verifiable operator identity. This is a transparency gap requiring verification rather than, by itself, proof of fraud. The site’s valid domain-validated certificate and conventional hosting arrangements demonstrate technical deployment, not regulatory standing or operator legitimacy. No matching third-party broker profile was identified.

EVIDENCE

- The homepage provides “Privacy Policy” and “Terms of Service” links but does not visibly state a legal entity or licensing authority.
- The site’s transport encryption uses a DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid to 2027-03-01T03:19:30+00:00.
- The hosting infrastructure is served from AS16509, Amazon.com, Inc., US.

What to Verify Next

Before any personal-information submission or other sensitive interaction, independently confirm that the domain is the intended official site and obtain the operator’s legal identity through an offline or independently sourced channel. Any claimed healthcare, commercial, or other regulated activity should be checked against the relevant official registry before engagement. The domain should not be used for login, credential submission, financial activity, or other sensitive transactions while the external threat detections remain unresolved.

EVIDENCE

- The homepage’s only active collection mechanism is a single contact-email signup form.
- The page displays a copyright notice for 2026 but does not provide an independently verifiable company name or registration detail.
- The page links to its privacy and terms documents, which should be reviewed for the responsible entity, data-use basis, and applicable jurisdiction.

Summary Verdict

The website has a **critical sensitive-interaction risk posture**. Its limited coming-soon presentation does not reconcile the confirmed external threat and blacklist signals, and the real-world operator remains unverified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, with both observed edge addresses associated with AS16509 and Amazon.com, Inc.; the origin server was not observable in this analysis. This edge protection reduces direct exposure of the origin infrastructure but is only a mitigating technical control and does not establish legitimacy.

Closing Assessment

Treat the domain as unsuitable for sensitive engagement unless and until its official status, responsible operator, and external threat detections are independently resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuselPDB: 8 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [acupressureexpert.in](#).

- The request stayed on [acupressureexpert.in](#). It was not redirected to another domain. CLEAR
- Registration is published under [GoDaddy.com, LLC](#). CLEAR
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. NOTED
- The registration is paid up to 2027-04-15. NOTED
- The earliest public archive of this site is from 2022-07-01. CLEAR
- It is hosted on [AMAZON-02](#), from a server in [US](#). NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [acupressureexpert.in](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
