

Is adappi.co legit? TrustSniffer's high-trust assessment: 87/100

adappi.co

Verdict

87

OUT OF 100

HIGH TRUST

adappi.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 70%.

What this site appears to be

Notix informational page stating the domain is used for push notification delivery, clarifying it does not sell goods or request payments, and providing contact/support information for reporting abuse.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://adappi.co/>

This domain is an existing, operating and legitimate technical site operated by NOTIX for push notification delivery only. It does not create or control any creatives or content itself and

What adappi.co served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website at adappi.co presents itself as a Notix-operated technical and informational service for push-notification delivery, rather than as a retail, investment, or payment-taking platform. Its apparent business model is infrastructure or B2B service provision, with the homepage explaining the service's role and directing visitors toward informational, privacy, terms, and abuse-reporting resources.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction signals were observed. The homepage describes a technical service, expressly states that the domain does not sell goods or services or request payment, and presents no login, payment, wallet-connection, or sensitive-data form. The site's apparent operator identity is not independently verified, so the "operated by NOTIX" statement remains an on-site claim rather than proof of the real-world operator. External reputation checks were clean, and the domain has a meaningful global traffic presence, supporting the conclusion that the site is apparently legitimate and low risk rather than contradictory or deceptive.

EVIDENCE

- Homepage states that the domain is used for push-notification delivery and does not facilitate goods or service sales or request payment.
- Homepage behavior recorded 0 external XHR requests, 0 hidden forms, 0 password-external forms, 0 wallet-provider detections, and 0 clipboard-write detections across 2 successful runs.
- Domain registration record: created 2023-05-25; age 3.23 years.
- Archive record: 18 snapshots spanning 2023-08-14 to 2025-09-09, covering 3 years.

Regulatory Verification Notes

The available content is consistent with a technical infrastructure service, not a financial or investment offering, and it makes no regulated-financial-service or licensing claim. The page identifies the service as Notix-operated and provides terms, privacy, cookies, and abuse-reporting references, but the available material does not independently establish the underlying legal entity or any applicable registration. WHOIS privacy is an administrative attribution limitation rather than an identity contradiction. A third-party broker-reputation dataset returned no match; this is contextual reputation information, not a licensing determination.

EVIDENCE

- Domain registrar: URL Solutions Inc.; registration record lists expiration as 2027-05-25.
- Hosting infrastructure: served from AS9002, RETN-AS – RETN Limited, GB.
- TLS certificate: issuer E8; DV validation; valid to 2026-08-25T21:04:05+00:00.
- Homepage provides Terms, Privacy, Cookies, and abuse-reporting references but no financial licence number.

What to Verify Next

Before credential or payment interactions connected with any broader Notix relationship, independently confirm the legal entity behind the service and that the relevant terms and privacy disclosures apply to the intended transaction. Confirm official support and contact channels through an independently sourced route, and obtain ordinary payment-protection and return-policy assurances where a separate transaction or service agreement is involved. If the service is being used in a regulated deployment, confirm the applicable registration or authorisation with the relevant jurisdictional registry.

EVIDENCE

- Homepage identifies the service as Notix-operated but does not independently document the operator's legal identity.
- Homepage links to Terms, Privacy, and Cookies information.
- The observed homepage contains 0 forms and no payment-action workflow.

Summary Verdict

Available evidence supports a high-trust, low-risk posture consistent with an established, apparently legitimate technical website. The site presents no observed contradiction or abuse pattern, while real-world operator identity remains unverified; legitimacy is therefore evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves through RETN Limited in the United Kingdom, with no CDN detected and two likely origin addresses identified. This is an identifiable hosting posture without an observed infrastructure anomaly; the available transport and network signals provide a reasonable mitigating basis, but infrastructure alone does not establish operator legitimacy.

Closing Assessment

Routine informational access is proportionate; credential or payment interactions should follow ordinary independent checks of the counterparty, applicable terms, and available payment protections.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adappi.co.

- The request stayed on adappi.co. It was not redirected to another domain. CLEAR
- Registration is published under URL Solutions Inc.. CLEAR
- DNS for this domain is served by awsdns-09.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-25. NOTED
- The earliest public archive of this site is from 2023-08-14. CLEAR
- It is hosted on RETN-AS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adappi.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
