

# Is adcentral.com.mx a scam? TrustSniffer's high-risk assessment: 0/100

adcentral.com.mx

## Verdict

0

OUT OF 100

CRITICAL RISK

adcentral.com.mx shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language login page with minimal footer text (privacy, terms) and a copyright notice; no service description or contact details visible.

## Compromised host notice

A threat-intelligence feed listed a file on adcentral.com.mx as hosting scam content (last seen 2026-09-22). TrustSniffer's evidence indicates that the site itself was compromised: the listing concerns a file placed on it by someone else, and the site's owner is most likely a victim, not the actor.

Until the file is removed, downloading anything from this site is not safe. If you run this site, remove the listed file, update the site software and its plugins, change its passwords and review it for other unauthorized changes.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

https://adcentral.com.mx/

What adcentral.com.mx served when TrustSniffer captured it on 2026-09-22. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Spanish-language login and authentication portal that presents a “Remember me” option, privacy and terms links, and a footer stating that it is “developed and operated by Adventa D.R.” It provides no visible explanation of the service, products, commercial purpose, or value flow, so its apparent function is limited to collecting account-entry information without meaningful public context.

## Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. The login-only page contains a sensitive form but no service description, company information, contact details, or surrounding context that would allow the operator's purpose to be established. The on-page attribution to Adventa D.R. is an unverified claim rather than proof of identity. External security analysis recorded two malicious detections and a confirmed blacklist status, creating a direct contradiction to treating the login endpoint as trustworthy. No separate brand-impersonation or conflicting legal-identity finding was observed, but the combination of confirmed blacklist status, malicious detections, and an unexplained credential-entry page warrants a clearly cautionary posture. Evidence:

- The homepage is classified as a login-only page and contains one sensitive login form, with no product or service explanation.
- The page footer states "Desarrollado y operado por Adventa D.R." but supplies no independently verifiable operator context.
- External reputation checks recorded 2 malicious detections and a confirmed blacklist finding.
- Domain registration date: 2013-11-13; age 12.87 years.
- Archive history: 418 snapshots spanning 2015-07-10 to 2025-03-23, covering 11 tracked years.

## Regulatory Verification Notes

The visible footer provides privacy and terms links, but the reviewed page does not disclose a licensing authority, registration number, regulated status, or substantive legal-entity information. The business model is therefore not assessable from the public page, and the operator attribution remains unverified. This is a material disclosure gap for any service that requires credentials or may involve financial activity; it should be treated as a verification requirement rather than as evidence of a separate identity contradiction. A local broker-reputation dataset produced no match, which is limited contextual information and does not establish licensing or regulatory standing. The transport layer is technically valid, but a domain-validated certificate authenticates encrypted transport, not the real-world operator. Evidence:

- The homepage exposes only "Aviso de privacidad" and "Términos y condiciones," without a visible license, registration number, or regulatory authority.
- The site is hosted on AS31898, ORACLE-BMC-31898, Oracle Corporation, US.
- TLS certificate issuer: YR1; validation level: DV; valid to 2026-10-22T19:51:48+00:00.
- The reviewed broker-reputation dataset returned no match.

## What to Verify Next

Before any sensitive interaction, an institution should independently confirm that Adventa D.R. is the legally responsible operator through an authoritative corporate or regulatory register, and should confirm whether the underlying service requires authorization in the relevant jurisdiction. The privacy and terms documents should be reviewed for a legal entity, physical address, governing law, complaint process, and data-handling obligations. Any official support or contact channel should be confirmed through an independent offline or previously trusted source rather than relying solely on the login page. Credentials should not be reused, and any potential financial workflow should remain suspended until those checks are complete. Evidence:

- The homepage provides only a login interface and minimal footer links, leaving the service purpose and operator relationship unresolved.
- The page contains no visible licensing authority or registration number to validate against an external register.

- The operator attribution appears only in the page footer and is not independently corroborated in the reviewed content.

Summary Verdict

The website has a critical trust posture and should not be treated as a trustworthy endpoint for account access or other sensitive interaction. The decisive concern is the convergence of confirmed external blacklist status, malicious detections, an unverified operator attribution, and a credential-entry page without business context. The available evidence does not establish a reliable connection between the website and a legitimate real-world service provider.

Infrastructure Integrity

The site resolves directly to Oracle-hosted infrastructure rather than a detected CDN or WAF edge, with no origin candidates identified in the supplied network analysis. Oracle hosting and a valid DV certificate provide basic availability and encrypted transport, but these infrastructure characteristics do not offset the site-level reputation and identity concerns.

Closing Assessment

The appropriate disposition is to suspend login, credential submission, and financial interaction pending independent operator, legal-status, and service-purpose verification. Any suspected exposure should be handled under the organization’s credential-compromise and incident-response procedures.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE
- The page presents a sign-in form, and the operator behind it could not be independently verified.  
Page content rule:PAGE\_TYPE\_LOGIN\_UNVERIFIED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of adcentral.com.mx.

- The request stayed on adcentral.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. CLEAR
- DNS for this domain is served by hostgator.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-13. NOTED
- The earliest public archive of this site is from 2015-07-10. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about adcentral.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
