

Is adcon-tech.co.za legit? TrustSniffer's high-trust assessment: 100/100

adcon-tech.co.za

Verdict

100

OUT OF 100

HIGH TRUST

adcon-tech.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Adcon-Tech presents enterprise contact-centre technology and cloud solutions, including OmniSense, SpamSense, ContactSense, RouteSense, and Absolute Secure Access. The page provides South African sales contact information and a physical Sandton office address, with a newsletter signup.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Adcon-Tech is a South African business-to-business technology provider presenting contact-centre software, cloud services, security, analytics, and productivity solutions for enterprise clients through product sales, service contracts, and support.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The homepage presents a coherent B2B technology model, named solutions, South African contact details, and a physical Sandton office address; it does not solicit deposits, investment returns, or cryptocurrency activity. The site's established identity and continuous historical presence further support a legitimate interpretation.

EVIDENCE

- Registered in 2020 (~6.37 years old), with Teleforge identified as the organization and GoDaddy.com, LLC as registrar.
- 294 archive snapshots spanning 2020–2026, covering 7 tracked years with no detected repurposing.
- External screening recorded 0 malicious and 0 suspicious detections, with no phishing warning identified.
- The homepage contains no login form, hidden form, wallet connection, or sensitive submission workflow.

Regulatory Verification Notes

The site presents commercial contact-centre technology rather than a regulated financial service. Its reviewed content does not state a financial license or registration number, so any procurement or enterprise engagement should confirm the contracting entity and applicable service obligations through formal documentation. The displayed business contact information and physical office address provide useful commercial disclosure, while the absence of a broker or comparable third-party match is contextual rather than a legal determination.

EVIDENCE

- The homepage identifies OmniSense, SpamSense, ContactSense, RouteSense, Contact Centre Cloud, and Absolute Secure Access as business solutions.
- Hosted on AS58182 through Wix.com Ltd. in Israel.
- TLS certificate issued by WR1 using DV validation, valid to 2026-09-28.
- The homepage lists a South African sales telephone number and a Woodlands Office Park address in Sandton.

What to Verify Next

Before a formal enterprise engagement, procurement teams should confirm the contracting legal entity, obtain applicable service terms and data-processing documentation, and validate the stated office and sales channels through independently sourced corporate records. Technical due diligence should also confirm that the proposed service configuration matches the products described on the site.

EVIDENCE

- The homepage identifies the business as “Adcon South Africa” and describes service delivery to contact-centre clients.
- The site provides one newsletter-subscription form and no sensitive customer-data form.
- The stated offerings span contact-centre software, cloud services, analytics, routing, spam prevention, and secure access.

Summary Verdict

The website presents as a legitimate, established, and trustworthy enterprise technology provider. Its coherent business purpose, sustained domain history, clean reputation signals, and consistent site content support normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves to a single identified hosting address operated through Wix.com Ltd.; no CDN was detected. This mainstream hosted infrastructure is a mitigating operational signal, although hosting arrangements alone do not establish business legitimacy.

Closing Assessment

Normal business engagement is appropriate, subject to standard procurement, contractual, and service-level due diligence.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adcon-tech.co.za.

- The request stayed on adcon-tech.co.za. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by awsdns-13.net, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-03-20. [NOTED](#)
- The earliest public archive of this site is from 2020-11-01. [CLEAR](#)
- It is hosted on wix_com, from a server in IL. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adcon-tech.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
