

# Is adhinayok.com a scam? TrustSniffer's high-risk assessment: 0/100

adhinayok.com

## Verdict

0

OUT OF 100

CRITICAL RISK

adhinayok.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

An auto-generated directory index page (file listing) served by LiteSpeed; no forms, commerce, or credential requests present.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://adhinayok.com/

What adhinayok.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Google, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

adhinayok.com presents a bare server directory rather than a developed commercial or financial service: visitors see an “Index of /” file listing containing a `cgi-bin` directory and a LiteSpeed Web Server footer, with no visible account, payment, trading, or credential-collection flow.

Scam/Impersonation Risk

**Confirmed external reputation contradictions materially outweigh the benign appearance of the captured page.** The domain is reported as malicious by Google Safe Browsing and was detected by 16 of 22 evaluated reputation engines, with Google, Kaspersky, and Sophos among the flagged providers. These findings support a critical sensitive-interaction risk assessment even though the observed page contains no login form, hidden form, external submission, wallet connection, or active financial flow. No separate brand-impersonation finding or conflicting legal-entity identity was observed; the concern is the confirmed blacklist and malicious-reputation signal attached to the domain. The historical record shows sustained prior activity, but that continuity does not neutralize the current external detections.

#### EVIDENCE

- The homepage served an auto-generated “Index of /” directory with only a `cgi-bin` entry and a LiteSpeed footer; no forms or credential requests were visible.
- External reputation telemetry recorded 16 malicious and 1 suspicious detections out of 22 evaluated results, including Google, Kaspersky, and Sophos.
- Google Safe Browsing classified the domain as malicious, and the domain was present on external blacklist records.
- Archive telemetry recorded 833 snapshots from 2010-08-17 through 2026-03-03, covering 17 tracked years.

#### Regulatory Verification Notes

The captured homepage does not display a company name, licensing statement, registration number, or regulated-service disclosure. This is a transparency gap rather than independent proof of wrongdoing, particularly because the visible site is an informational directory rather than a declared financial service. Registration data identifies Engr. Tahmid Anwar as CEO and Chittagong Online Limited as the organization, but the available evidence does not independently verify that this party operates the website. The domain uses a valid domain-validated TLS certificate and identifiable hosting, which establish technical service continuity but do not validate legal status or operator identity.

#### EVIDENCE

- WHOIS records show registration on 2015-11-12, with an age of 10.78 years and expiry on 2026-11-12; the registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.
- WHOIS identifies Engr. Tahmid Anwar (CEO) and Chittagong Online Limited, without an independent linkage to the captured homepage.
- The site was served from AS24940, HETZNER-AS - Hetzner Online GmbH, DE.
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-09-30.

#### What to Verify Next

Before any sensitive interaction, an organization should confirm through an independent, offline channel whether the named organization actually controls the domain and whether any intended service is authorized in the relevant jurisdiction. The current page should also be checked for unauthorized file changes, redirects, or content that differs from the directory view observed during this assessment. Any future request to download files, authenticate, submit information, or make a payment should be validated against a separately sourced official contact and endpoint.

## EVIDENCE

- The captured homepage contains no visible login, signup, payment, commerce, or financial workflow to validate.
- The page exposes a server directory rather than a documented service interface, leaving the purpose of the listed files unestablished.
- The recorded reputation conflict warrants independent confirmation of domain control before sensitive use.

## Summary Verdict

The website has a **critical sensitive-interaction risk posture**. Its simple, non-interactive presentation does not offset the confirmed malicious-reputation and blacklist contradictions, while the real-world operator remains unverified. The available evidence supports treating the domain as unsuitable for sensitive engagement.

## Infrastructure Integrity

The site is protected by a CDN/WAF layer, with the observed address presented as an edge address and no origin candidate visible in this analysis. This reduces direct exposure of the underlying service and may limit some network-level abuse, but protective infrastructure cannot counteract the domain-level reputation findings.

## Closing Assessment

The appropriate institutional disposition is to block or isolate sensitive interaction with the domain and require independent domain-control and service-purpose validation before any exception is considered.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

### 01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT\_BLACKLIST\_CRITICAL

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of adhinayok.com.

- The request stayed on adhinayok.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by ctghostbd.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-12. NOTED
- The earliest public archive of this site is from 2010-08-17. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about adhinayok.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
