

Is adieuholidays.com a scam? TrustSniffer's high-risk assessment: 0/100

adieuholidays.com

Verdict

0

OUT OF 100

CRITICAL RISK

adieuholidays.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

The page displays an 'Account Suspended' message with no functional content, links, or forms. It provides only a hosting contact suggestion and exposes no service or transactional features.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What adieuholidays.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Google, Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

adieuholidays.com currently presents only a hosting-provider “Account Suspended” notice rather than an operating website. It offers no functional content, service description, transaction path, login interface, or identifiable business model, so its apparent purpose cannot be established from the live page.

Scam/Impersonation Risk

The available evidence supports a **critical sensitive-interaction risk**. Independent threat-intelligence checks identified malicious detections and a confirmed blacklist status, including detections associated with Google, Fortinet, and Sophos. The suspended-page state does not itself demonstrate impersonation or phishing, and no conflicting legal-entity names were observed; however, those limited page-level findings do not offset the confirmed external reputation contradictions. The domain’s real-world operator also remains unverified, so the site should not be treated as an authenticated holiday business or other legitimate service.

EVIDENCE

- External checks recorded 9 malicious detections among 14 evaluated results and a confirmed blacklist status.
- The domain was registered on 2015-01-12 and is approximately 11.61 years old.
- Historical records span 2015–2025, representing 11 years tracked.
- The homepage title and body state “Account Suspended” and provide no operational service content.

Regulatory Verification Notes

The live page provides no company identity, licensing information, registration number, terms, or other legal disclosures. This is a material verification gap because the site is suspended and cannot substantiate who operates it or what regulated activity, if any, it would conduct. No broker match was identified in the available third-party contextual dataset; that absence is not a licensing determination. The domain's registration through GoDaddy.com, LLC and the presence of transport encryption are infrastructure or administrative facts, not evidence that the operator is licensed or authorized.

EVIDENCE

- The suspended homepage contains no legal, corporate, licensing, or regulatory disclosure.
- The domain registrar is GoDaddy.com, LLC.
- The TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-09-21 06:13:52 UTC.

What to Verify Next

Before any sensitive interaction, an independent registry check should establish the operator's legal entity and any authorization required for the services the domain is intended to provide. Any proposed payment, account, or investment relationship should be confirmed through independently sourced contact details and payment-protection mechanisms, rather than information presented by the domain itself. If the domain later becomes active, its terms, refund arrangements, privacy disclosures, and transaction counterparties should be reviewed before engagement.

EVIDENCE

- The current page exposes no functional forms, login workflow, payment flow, or service documentation.
- The operator's identity is not independently verified.
- The available evidence records no verified license claim or licensing authority.

Summary Verdict

The overall posture is **critical trust risk**, driven by convergent external threat detections, confirmed blacklist status, and the absence of an operating service that can substantiate its purpose or operator. The site is not suitable for credentials, account access, payments, or other sensitive interactions.

Infrastructure Integrity

The site resolves directly to one likely origin address on AS46606, operated by Unified Layer in the United States; no CDN or WAF edge layer was observed. The valid TLS configuration provides transport encryption only and does not mitigate the external reputation risk.

Closing Assessment

Sensitive interaction should be withheld unless the operator, authorization status, and intended business purpose are independently validated through authoritative channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adieuholidays.com.

- The request stayed on adieuholidays.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR

- DNS for this domain is served by bigrockservers.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-12. NOTED
- The earliest public archive of this site is from 2015-03-12. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adieuholidays.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
