

Is admarindcc.com a scam? TrustSniffer's high-risk assessment: 5/100

admarindcc.com

Verdict

5

OUT OF 100

CRITICAL RISK

admarindcc.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

ADMARIN DCC corporate website presenting ship design, engineering, consultancy and contracting services. The page contains numerous PHP deprecation warnings visible in content, site navigation (Home, Who We Are, Services, Projects, Contact) and marketing copy about being a Turkish pioneer in ship design.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What admarindcc.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

ADMARIN DCC is a corporate website presenting ship design, engineering, consultancy, and contracting services for maritime projects, with sections for company information, services, projects, and contact; its apparent business model is professional B2B engagement rather than consumer commerce or financial services.

Scam/Impersonation Risk

The site carries a **material external reputation contradiction**: external threat intelligence recorded six malicious and two suspicious detections, and the domain is listed by two external blacklist sources. This drives a clearly cautionary posture despite the absence of observed login forms, credential-harvesting mechanisms, wallet activity, or overt phishing content on the captured homepage. The site's apparent maritime-services purpose is also not, by itself, sufficient to offset the external detections. No conflicting legal-entity names or on-page brand-impersonation indicators were observed.

EVIDENCE

- External reputation telemetry recorded 6 malicious and 2 suspicious detections for the domain.
- The domain was recorded as blacklisted by 2 external sources.
- The homepage capture contained no login form, sensitive form, hidden form, or external password-submission destination.
- The domain was registered in 2014 (~11.91 years old) through DYNADOT LLC.

Regulatory Verification Notes

The available content presents a conventional corporate-services profile, but the operator's real-world identity remains unverified. No licensing claim, licensing authority, or registration number is shown in the supplied business information, creating a specific disclosure gap for contractual onboarding rather than standalone proof of fraud. Visible PHP deprecation warnings on the homepage also indicate deficient production maintenance and reduce confidence in the site's operational quality. A low page-authority signal and the absence of a broker-dataset match provide contextual limitations, not legal or regulatory conclusions.

EVIDENCE

- The homepage title identifies "ADMARIN DCC – We are Pioneers From Turkey," while the visible navigation provides "Who We Are," "Services," "Projects," and "Contact" sections.
- The supplied business-model assessment records no claimed license, licensing authority, or license number.
- The site's hosting infrastructure resolves through AS219450, VOYAR - VOYAR VERIMERKEZI TEKNOLOJILERI LTD. STI, TR.
- TLS uses issuer YR1 with DV validation and is valid to 2026-08-27T09:57:28+00:00.

What to Verify Next

Before any sensitive engagement, the prospective counterparty should obtain the site's full legal entity name, registration details, physical business address, and contractual signatory information, then verify those details through the relevant Turkish corporate and maritime-industry registers. Any proposed payment beneficiary, bank account, or contractual entity should be checked independently rather than relying solely on contact details supplied by the site. Official contact channels should also be confirmed through an independent, offline route, and the site should be rechecked after its transport certificate reaches its stated validity date.

EVIDENCE

- The site exposes dedicated "Who We Are" and "Contact" navigation points that can be used to request formal counterparty documentation.
- The supplied content describes commercial maritime services but does not provide a license authority or registration number.
- The certificate validity date is 2026-08-27T09:57:28+00:00, providing a defined point for subsequent transport-security validation.

Summary Verdict

The overall posture is **critical trust risk**, with sensitive interaction risk driven by confirmed external reputation contradictions. The site's corporate presentation and technically functional page do not establish sufficient confidence for identity-sensitive, credential-related, or financial engagement.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF layer, with one resolved origin candidate; this provides fewer protective intermediary controls than mainstream edge-protected hosting. Direct hosting through VOYAR - VOYAR VERIMERKEZI TEKNOLOJILERI LTD. STI in Türkiye is a concrete infrastructure fact, but hosting infrastructure is only a mitigating or contextual signal and does not establish legitimacy.

EVIDENCE

- Hosted on AS219450 (VOYAR - VOYAR VERIMERKEZI TEKNOLOJILERI LTD. STI, TR).
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN vendors were detected.

Closing Assessment

Sensitive actions should be withheld, and any prospective business engagement should remain limited to independently validated due diligence until the counterparty and its transaction details have been confirmed through authoritative external channels.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of admarindcc.com.

- The request stayed on admarindcc.com. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by dyna-ns.net, across 2 name servers. NOTED
- The registration is paid up to 2027-09-23. NOTED
- The earliest public archive of this site is from 2003-08-03. CLEAR
- It is hosted on VOYAR, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about admarindcc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
