

Is adme.media legit? TrustSniffer's high-trust assessment: 100/100

adme.media

Verdict

100

OUT OF 100

HIGH TRUST

adme.media appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Russian-language lifestyle editorial page containing multiple short human-interest and themed article listings (stories about countryside, food, pets, gardening, travel). No login or payment flows detected; appears to be an ad/content site.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

adme.media is a Russian-language lifestyle and human-interest editorial website presenting articles on travel, food, pets, gardening, culture, and everyday life. Its apparent business model is advertising- and content-driven publishing, with no observed login, payment, or other sensitive transaction flow.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, malicious-content, confirmed impersonation, or blacklist indicators. The site's long-established publishing continuity, substantial public traffic footprint, clean external reputation checks, and consistent editorial purpose support an apparently legitimate content operation. A name-similarity heuristic associated the branding with me.com, but there is no corroborating evidence of impersonation. Behavioral review noted advertising-related external activity and two suspicious inline scripts; this signal is limited by the absence of hidden forms, credential collection, wallet activity, cloaking, or other sensitive interaction mechanisms, and is consistent with a content site using advertising technology.

EVIDENCE

- The homepage presents substantial Russian-language editorial content across lifestyle, food, travel, pets, gardening, and human-interest topics.
- The domain was registered in 2020 and is approximately 6.06 years old; archive records contain 2,971 snapshots spanning 2020-07-20 through 2026-08-08, covering 7 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no malicious web-safety result; the site ranked 5881 and was within the top 1,000,000 websites.
- Browser analysis recorded 2 successful runs, 0 hidden forms, 0 password-bearing external forms, 0 wallet-connection runs, and 0 cloaking classification.

Regulatory Verification Notes

The site presents as an editorial publication rather than a regulated financial, investment, or payment service, so no financial licensing representation was observed. The available material does not independently verify the real-world operator behind the publication; accordingly, legitimacy is evidence-consistent and apparent rather than proven. No broker-dataset match was identified, which is contextual reputational support only and is not a licensing or regulatory determination. If the site later introduces subscriptions, commerce, or other paid services, the relevant merchant identity, terms, refund arrangements, and any applicable registration should be assessed separately.

EVIDENCE

- The observed homepage is categorized as content/editorial and news/media, with no login or payment flow detected.
- The site is served through AS7979, SERVERS-COM — Servers.com, Inc., US, with hosting resolved in the Netherlands.
- Transport encryption uses a DV certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 2027-02-24T15:49:23+00:00.
- No licensing claim, license authority, or license number was presented in the supplied site material.

What to Verify Next

Before any future credential or payment interaction, an independent check should confirm the publication's real-world operator and official contact channels through a trusted offline or previously established route. If paid products or subscriptions are introduced, the applicable merchant identity, refund policy, terms, and payment-provider protections should be confirmed independently before proceeding. Routine browsing of the observed editorial content does not present the same verification requirement because no sensitive interaction flow was detected.

EVIDENCE

- The homepage contains no sensitive forms, login form, password submission, or payment mechanism.
- The observed business model is advertising and editorial publishing rather than a regulated financial or transactional service.
- The available identity evidence supports continuity of the site's publishing purpose but does not independently connect it to a verified legal operator.

Summary Verdict

The overall posture is high trust and low risk, consistent with an established, apparently legitimate editorial website. No scam or impersonation contradiction was identified, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to its hosting environment rather than a detected CDN edge, so the infrastructure provides conventional hosting integrity but should not be treated as proof of legitimacy. The identified provider and valid mainstream certificate are mitigating technical signals.

EVIDENCE

- Hosting is identified as AS7979 (SERVERS-COM — Servers.com, Inc., US), with 3 resolved IP addresses and 3 likely origin addresses.
- No CDN was detected; the resolved hosting country is NL and the registry is RIPE NCC.
- TLS validation level is DV; issuer is Go Daddy Secure Certificate Authority - G2; validity ends 2027-02-24T15:49:23+00:00.

Closing Assessment

Normal editorial browsing is proportionate to the observed risk posture; credentials or payments should be limited to situations where independent operator, merchant, return-policy, and payment-protection checks have been completed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adme.media.

- The request stayed on adme.media. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2020-07-20. CLEAR
- It is hosted on SERVERS-COM, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adme.media at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
