- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

AB模板网 is a Chinese digital-goods marketplace providing website templates, source code, CMS plugins, tutorials, VIP resources, and related website-development services for customers building or maintaining websites.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The site's substantial, internally consistent content presents a conventional ecommerce model: PbootCMS, HTML, and Dedecms templates; source-code downloads; plugins; tutorials; VIP memberships; and customization or consulting services. This is consistent with a legitimate established digital marketplace, and normal account login and standard use are appropriate.

- The homepage identifies the service as a professional PbootCMS and business-website-template platform and displays extensive template categories and current listings.
- The site presents ordinary ecommerce functions, including VIP membership, registration, login, product details, and digital-resource access.
- The domain has 846 archive snapshots spanning 2014-08-08 to 2026-07-24, covering 13 years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the site ranked 124654 in the global traffic dataset.

Regulatory Verification Notes

The business appears to sell digital resources rather than offer a regulated financial service, so no financial licensing claim is expected from the available content. The site does not identify a regulatory license or license number, leaving a limited disclosure point for any jurisdiction-specific consumer, tax, copyright, or ecommerce requirements. This is a verification matter, not evidence of deception. The registered owner is identified as 杭州金豆网络科技有限公司, and registration is through 阿里云计算有限公司 (万网) .

- Domain registration: 2013-05-13; approximately 13.23 years old; expiration 2027-05-13.
- Hosted on AS24429 through Taobao - Zhejiang Taobao Network Co.,Ltd, CN.
- TLS certificate issued by sslTrus (RSA) DV CA, validation level DV, valid to 2026-10-26.
- The homepage and service catalogue describe template sales, software resources, tutorials, and website-development services without a regulated-finance offering.

What to Verify Next

For a prospective commercial engagement, confirm the applicable business, copyright, tax, and consumer-protection requirements in the relevant jurisdiction, and review the site's purchase, refund, licensing, and

support terms before acquiring digital materials. Payment and downloaded files should be checked against the agreed product description and licensing scope.

- The homepage lists downloadable templates, source code, plugins, software resources, and educational materials.
- VIP membership and product-access arrangements are presented as commercial offerings.
- The available analysis found no sensitive submission form beyond the site's ordinary login functionality.

Summary Verdict

The website presents a legitimate, established, and trustworthy digital-goods business with a coherent service model, sustained historical presence, clean external reputation, and no observed contradiction or impersonation signal. Its overall posture supports normal interaction, including account login and standard transactions.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by Taobao - Zhejiang Taobao Network Co.,Ltd on AS24429, with no CDN or WAF layer identified. Transport encryption is provided by a valid DV certificate issued by sslTrus (RSA) DV CA; the hosting arrangement is a mitigating technical factor but does not independently establish legitimacy.

Closing Assessment

Standard use is appropriate, with ordinary commercial review of purchase terms and licensing conditions before material transactions.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adminbuy.cn.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adminbuy.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
