

Is adobeguadalupe.com safe? TrustSniffer's low-trust assessment: 40/100

adobeguadalupe.com

Verdict

40

OUT OF 100

LOW TRUST

adobeguadalupe.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be	Official-looking winery site (Adobe Guadalupe) with age gate, product listings, online store and booking/contact information. Local address and phone numbers provided; no evident requests for sensitive credentials or financial deposits beyond normal ecommerce checkout.

What adobeguadalupe.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an official-looking winery and hospitality storefront presenting wine, tequila, mezcal, tastings, lodging, horseback riding, weddings, and related experiences, with revenue apparently derived from direct product sales, shipping, bookings, and hospitality services.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional winery business: it uses an age gate, displays product listings, provides booking pathways, and does not expose a login form, credential-collection form, wallet connection, or unusual financial-deposit request. However, this benign page presentation is outweighed by material external contradictions: two malicious detections, one suspicious detection, and confirmed blacklist status from two external sources. No page-level impersonation or phishing mechanism was identified, and the historical record shows continuity rather than suspicious repurposing, but the reputation findings create a high-risk basis for sensitive interaction. The real-world operator is only apparently connected to the site and is not independently verified.

EVIDENCE

- The homepage contains an age-verification gate and presents wine, tequila, mezcal, store, experience, lodging, and contact pathways.
- External reputation checks recorded 2 malicious and 1 suspicious detections, with blacklist status confirmed by 2 sources.
- The domain was registered on 2001-06-12 and is 25.21 years old.
- The archive contains 368 snapshots spanning 2002–2026, with 25 years tracked.

Regulatory Verification Notes

The site describes an ecommerce and hospitality model involving named wine products, Tía Tula tequila, Lucifer mezcal, tastings, lodging, horseback riding, and weddings. The supplied content identifies no licensing claim, license number, or independently verified regulatory authorization; this is a disclosure gap requiring confirmation rather than proof of misconduct. The contact and booking presentation supports an identifiable commercial presence, but it does not resolve the external reputation contradiction or independently establish the operator's legal identity.

EVIDENCE

- The homepage and store pages identify wine and distilled-product sales, including Tía Tula tequila and Lucifer mezcal.
- The experiences, lodging, horses, weddings, and contact pages describe hospitality and booking services.
- The site's transport encryption is a DV certificate issued by YR1, valid to 2026-10-05T09:45:42+00:00.
- The hosting infrastructure is served from AS29802, HVC-AS - HIVELOCITY, Inc., US.

What to Verify Next

Before any sensitive interaction, the operator should be confirmed through an independent channel rather than relying solely on the website. Any applicable alcohol-sale, hospitality, or local business authorization should be checked against the relevant official registry, and payment methods should be limited to those offering established dispute and buyer-protection mechanisms. Independent confirmation of the published business location, booking arrangements, cancellation terms, and official social or contact channels is also warranted.

EVIDENCE

- The contact page provides a local address and telephone numbers that can be independently validated.
- The store and booking pathways create separate purchase and reservation commitments that should be checked against published cancellation and fulfillment terms.
- The site exposes one age-verification form and no sensitive credential form in the observed page flow.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site has the appearance and operating model of a genuine winery, but that appearance is not sufficient to overcome the confirmed external reputation contradictions. Identity linkage remains apparent rather than proven.

Infrastructure Integrity

The site resolves through a single direct hosting endpoint on Hivelocity infrastructure, with no CDN or WAF edge layer identified in the observed configuration. This provides a straightforward technical hosting path but offers limited additional protective separation; infrastructure characteristics do not mitigate the external reputation concerns.

Closing Assessment

Interaction should remain limited to non-sensitive viewing until the operator, applicable authorizations, and transaction protections have been independently confirmed; login, credential submission, and financial commitments should not proceed on the current evidence.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adobeguadalupe.com.

- The request stayed on adobeguadalupe.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dkch.net, across 2 name servers. NOTED

- The registration is paid up to 2027-06-12. NOTED
- The earliest public archive of this site is from 2002-03-25. CLEAR
- It is hosted on HVC-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adobeguadalupe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
