

Is adpm.ir legit? TrustSniffer's high-trust assessment: 98/100

adpm.ir

Verdict

98

OUT OF 100

HIGH TRUST

adpm.ir appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Persian-language website for 'آريانا داده پردازى متين', an IT services company offering network design, deployment, support, virtualization and CCTV systems. The site is informational and marketing-focused, describing services, projects, certifications and contact options.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Persian-language corporate website for آریانا داده پردازی متین, presenting an Iranian IT-services business focused on network design, deployment and support, virtualization, CCTV systems, consultancy, projects, certifications, and business contact options.

Scam/Impersonation Risk

No contradictions were observed. The site presents a conventional corporate-services model rather than an aggressive monetization or investment proposition, and the supplied page analysis identified no phishing, brand-impersonation, malicious-script, hidden-form, wallet, or credential-harvesting indicators. Available external reputation checks also recorded no malicious or suspicious detections, although reputation coverage was partial; this supports a low apparent scam and impersonation risk without independently proving the operator's real-world identity.

EVIDENCE

- The homepage and company pages identify the business as آریانا داده پردازی متین and use a consistent corporate presentation; no suspected brand impersonation was detected.
- The homepage contained no login form, sensitive form, hidden form, wallet connection, or external password-submission mechanism.
- External reputation results recorded zero malicious detections, zero suspicious detections, no Google Safe Browsing malicious flag, and no blacklist hit.

Regulatory Verification Notes

The website appears to describe an ordinary commercial IT-services company rather than a business claiming financial, investment, or other regulated authorization. Its legal and identity presentation is sufficient for an apparent corporate profile, but the operator's real-world identity is not independently verified in the supplied evidence. The site does not present a licensing claim or registration number in the reviewed content; for this business model, that is a transparency and engagement-verification point rather than evidence of deception. A separate broker-reputation dataset produced no match and should be treated only as contextual support.

EVIDENCE

- Domain continuity is 14.01 years, with registration administered by IRNIC.
- The archival record contains 93 snapshots spanning 2012–2026, covering 15 years tracked.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-19.
- The homepage identifies the company and provides dedicated About, Projects, Certifications, Contact, Complaints, and online-store entry points.

What to Verify Next

Before a contractual, credential, or payment interaction, the prospective counterparty should independently confirm the company's legal identity, business address, and authorized contact channels through an offline or independently sourced route. Any required Iranian commercial registration or sector-specific authorization should be checked with the relevant official registry, and contracts should specify deliverables, support obligations, refund or termination terms, and payment-protection arrangements.

EVIDENCE

- The site provides About, Contact, Projects, Certifications, and Complaints sections that can be cross-checked against independently sourced company information.
- The stated business model is based on service contracts, support agreements, and project implementation, making written scope and service-level terms material to engagement.
- The site includes an online-store entry point; payment terms and counterparty details should therefore be confirmed independently before any purchase.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-contradiction signals were observed,

while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves directly to a single host on AS48434 operated by Tebyan - Tebyan-e-Noor Cultural-Artistic Institute in Iran, with no detected CDN or WAF layer and a visible likely origin host. The absence of an intermediary protective layer is an architectural consideration, not evidence of maliciousness; the confirmed DV TLS certificate provides transport encryption.

EVIDENCE

- Hosted on AS48434, Tebyan - Tebyan-e-Noor Cultural-Artistic Institute, IR; server IP 185.78.22.35.
- CDN detected: false; unique IP count: 1; edge IP count: 0; likely origin IP count: 1.
- TLS validation level: DV; issuer: YR1; valid to: 2026-10-19T09:22:14+00:00.

Closing Assessment

Ordinary browsing and routine business engagement are proportionate to the current evidence, subject to the independent merchant-identity, contractual, and payment-protection checks above before sensitive or financially binding actions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of adpm.ir.

- The request stayed on adpm.ir. It was not redirected to another domain. CLEAR
- Registration is published under IRNIC. CLEAR
- DNS for this domain is served by netafraz.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2012-08-16. CLEAR
- It is hosted on Tebyan, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about adpm.ir at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
