Full analysis

Overview

Advisor Holding is presented as a Brazilian corporate holding group spanning technology, financial services, entertainment, and wellness, with subsidiary brands including New Pay, PIX Manager, Set Prime, Neo Vida, Lavo Prime, and Expo Fitness, and an apparent business purpose of operating or managing those businesses while soliciting partnership opportunities.

Scam/Impersonation Risk

Contradictory external security intelligence materially changes the assessment despite the site's otherwise corporate presentation. The domain is blacklisted by two external sources, and two evaluated reputation detections classify it as malicious; this is a confirmed reputation concern and supports a high-risk posture for sensitive interactions. At the same time, the available page evidence does not show a login form, wallet connection, payment workflow, phishing form, brand-impersonation pattern, or other high-risk interaction mechanism. No identity contradiction was observed across the supplied site content, but the real-world operator remains unverified.

EVIDENCE

- The external reputation assessment recorded 2 malicious detections, with no suspicious detections.
- The domain was recorded as blacklisted by both an external blacklist source and the evaluated threat-reputation source.
- The homepage presents corporate/about content and one contact form; behavioral testing recorded 0 external XHR requests, 0 hidden forms, 0 wallet-provider detections, and 0 clipboard-hijack events.

Regulatory Verification Notes

The homepage identifies “Advisor Holding” and describes a group of businesses, but the supplied content does not claim a regulatory license or provide a license number or licensing authority. The site lists business areas that include financial services, while its legal and governance disclosures are limited to corporate marketing language and a copyright notice; this is a regulatory-transparency gap rather than, by itself, proof of fraud. The available third-party broker dataset contained no matching entity, so it provides no additional corroboration or adverse regulatory conclusion. The site's transport security and operational stability are positive technical conditions, but they do not establish the operator's legal identity or authorization.

EVIDENCE

- WHOIS records show registration on 2017-09-20, an age of 8.93 years, and expiry on 2026-09-20.
- The site's homepage identifies Advisor Holding and lists nine subsidiary or portfolio names, but no license number or licensing authority is displayed in the supplied content.
- The site is served from AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- TLS uses issuer YE1 with DV validation and is valid through 2026-10-05T19:00:01+00:00.

What to Verify Next

Before any sensitive engagement, the stated corporate identity should be matched against an authoritative Brazilian corporate registry and any applicable financial-services licensing registry. Partnership proposals, payment instructions, and any future account or financial workflow should be validated through independently sourced contact channels rather than relying solely on the site's contact form. Any transaction should use payment protections that permit dispute or recovery, and credentials should not be reused if the site later introduces authentication.

EVIDENCE

- The homepage offers a single partnership-oriented contact form and does not expose a separate authenticated or transactional workflow.
- The stated business model covers financial services as well as non-financial sectors, making activity-specific authorization checks necessary.
- The supplied analysis records the operator identity as unverified and the on-page disclosure state as unclear.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's coherent corporate presentation and absence of visible malicious interaction mechanics do not overcome the confirmed external reputation contradictions. Ordinary browsing may be limited to non-sensitive review, but the available evidence does not support treating the site as suitable for credentials, financial activity, or other high-impact engagement.

Infrastructure Integrity

The site resolves directly to four likely origin addresses rather than a detected CDN edge, with infrastructure associated with AS47583 and Hostinger International Limited; the observed hosting country is Ukraine. The infrastructure is technically resolved and TLS-protected, but those conditions are mitigating technical characteristics only and do not validate the site's ownership or legitimacy.

Closing Assessment

The proportionate action is to restrict activity to read-only review and defer credential, financial, or other sensitive interactions until the operator, authorization, and communication channels have been independently confirmed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about advisor.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
