Full analysis

Overview

イオンスタイルオンライン is an established Japanese e-commerce marketplace offering clothing, household goods, groceries, electronics, beauty and healthcare products, store-inventory checks, pickup services, membership features, promotions, and customer support.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail business model with product categories, shopping functions, store pickup, inventory services, customer support, and legal information; no phishing, impersonation, malicious-content, or blacklist indicators were identified. The domain and historical presence also support an established identity rather than a newly created or repurposed operation.

- Domain registered on 2008-04-03 and approximately 18.34 years old.
- 294 archive snapshots spanning 2020–2026, with 7 years tracked.
- The homepage is identified as an e-commerce homepage with no detected red flags or brand-impersonation indicators.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

The available content describes ordinary retail commerce, not a financial or investment service. The site presents customer-support and legal-information pathways, while no regulated-license claim or license number is recorded; this is a limited disclosure point for organizations requiring formal authorization checks, not evidence of deception. Registration privacy is an administrative detail and does not contradict the site's established identity.

- Hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- TLS certificate issued by SECOM Passport for Web EV 2.0 CA, with EV validation, subject organization AEON RETAIL Co., Ltd., valid to 2027-01-15.
- The homepage provides “お問い合わせ,” usage guidance, store pickup search, and related customer-service functions.
- The available business-model evidence records no claimed license authority or license number.

What to Verify Next

For regulated procurement or enterprise onboarding, confirm the applicable corporate and consumer-commerce disclosures through the site's legal-information pages and independently validate any authorization requirement relevant to the proposed transaction. Standard organizational controls should also confirm order, returns, delivery, and support procedures before material purchases.

- Legal-information and corporate-information pathways are identified on the site.
- Customer-support and usage-guidance pages are available for procedural confirmation.
- The shopping flow includes account, store-selection, inventory, and pickup-related functions that can be checked before completing an order.

Summary Verdict

The overall posture is high trust and established. The evidence converges on a legitimate retail entity with no observed scam, impersonation, phishing, or malicious-content contradiction. Normal account access and standard use are appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. Observed addresses are CDN edge servers, with no origin candidate identified in the supplied analysis; this reduces direct origin exposure and is a mitigating infrastructure factor, not proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal login, account, and purchasing activity under ordinary organizational transaction controls.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [aeonretail.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
