

Is afilio.com.br legit? TrustSniffer's high-trust assessment: 90/100

afilio.com.br

Verdict

90

OUT OF 100

HIGH TRUST

afilio.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Afilio is an affiliate/performance marketing platform targeting advertisers and affiliates in Latin America. The page promotes registering as an affiliate, requesting demos for advertisers, lists success stories, and provides office addresses and contact links. No obvious phishing or financial-yield claims are present in the captured text.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents Afilio as a corporate performance-marketing platform serving advertisers and affiliates in Latin America, with an apparent business model based on connecting campaigns to affiliate partners, facilitating performance-based commissions, and offering affiliate registration and advertiser demonstrations.

Scam/Impersonation Risk

No contradictions were observed. The site's content describes a coherent affiliate-marketing marketplace, provides business-oriented contact and office information, and contains no identified phishing, impersonation, financial-yield, or cryptocurrency indicators. The behavioral review recorded dynamic page changes and external network activity, but found no cloaking, hidden forms, wallet interactions, clipboard manipulation, or untrusted destinations; this is consistent with ordinary website operation rather than an abuse pattern. The available evidence is therefore consistent with an established, apparently legitimate website, although it does not independently verify the real-world operator identity.

EVIDENCE

- The homepage is titled "Afilio - Performance Marketing" and is classified as a corporate affiliate-marketing platform with no identified page red flags.
- The registration record lists creation on 2006-02-13 and an age of 20.51 years; the registered holder is shown as HI MIDIA SA.
- Historical coverage records 1,591 archive snapshots spanning 2006–2026, with 21 years tracked and a maximum gap of 1 year.
- The site's observed traffic rank is 58671, within the measured top 1 million websites.

Regulatory Verification Notes

The site's apparent commercial activity is affiliate and performance marketing rather than a financial-services offering, and no regulated-service claim or adverse broker-reputation signal is present in the supplied evidence. The corporate and contact material presents office addresses and contact links, but the captured content does not state a licensing authority or registration number; this is a verification and disclosure gap, not evidence of deception. Because the operator identity is not independently verified, the on-site business presentation should be treated as evidence of apparent legitimacy rather than proof of legal-entity identity.

EVIDENCE

- Corporate page content presents office locations, contact links, advertiser demonstration requests, affiliate registration, and success stories.
- The captured site content contains no stated license authority or license number.
- The domain is served through AS210250, identified as WPX - K Media Tech Ltd., BG.
- The site's TLS certificate is issued by YE2 at DV validation level and is valid to 2026-10-29.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal entity associated with the service, review the applicable terms, privacy provisions, commission arrangements, and any refund or payment-protection provisions, and validate published contact channels through an independent business source. If a regulated activity is later offered beyond affiliate marketing, the relevant authorization should be checked directly with the applicable registry.

EVIDENCE

- The site provides business-facing contact and office information that can be cross-checked through an independent route.
- The site offers separate advertiser and affiliate engagement paths, making the applicable commercial terms important to review before enrollment.
- The captured homepage contains no login form or sensitive form, so the principal verification point is the identity and terms governing any subsequent account or payment workflow.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. This assessment supports normal browsing and ordinary business evaluation, while not constituting independent proof of the real-world operator's identity.

Infrastructure Integrity

The site resolves to two likely origin addresses without observed edge IPs or a detected CDN vendor. Its hosting infrastructure is identified as WPX - K Media Tech Ltd., BG; this is a neutral operational observation and should be treated as infrastructure context rather than proof of legitimacy.

Closing Assessment

Prospective users should complete ordinary independent identity, terms, and payment-protection checks before submitting credentials or making payments, after which routine engagement is proportionate to the site's assessed posture.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [afilio.com.br](#).

- The request stayed on [afilio.com.br](#). It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by [co.uk](#), across 4 name servers. [NOTED](#)
- The registration is paid up to 2034-02-13. [CLEAR](#)
- The earliest public archive of this site is from 2006-03-17. [CLEAR](#)
- It is hosted on WPX, from a server in BG. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [afilio.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
