Full analysis

Overview

AFOSHACLASS is a Bahia-based association website presenting member benefits including preventive health services, discounted clinic access, salon services, a recreational club, legal assistance, and partner offers; its apparent business model is membership-supported community and welfare services rather than investment, lending, or online retail.

Scam/Impersonation Risk

No contradictions were observed across the available site content, technical checks, or external reputation signals. The website presents a coherent association identity, links to Facebook and Instagram, provides telephone and contact information, and contains no login workflow, wallet connection, investment solicitation, or deceptive financial-yield claim. The available evidence is therefore consistent with an established, apparently legitimate site, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies AFOSHACCLASS as an association serving workers in Bahia and presents member-benefit information without investment or high-yield claims.
- The domain registration record shows registration on 2019-05-06 and an age of 7.3 years.
- Archive records show 19 snapshots spanning 2021–2026, with 6 years tracked; the historical analysis found no suspicious repurposing or semantic drift.
- Available reputation checks recorded no malicious detections, phishing or blacklist hit, or abuse reports for the observed hosting address.

Regulatory Verification Notes

The site's apparent activity is membership-based association services, and the available pages do not present itself as a financial, investment, or regulated trading provider. The homepage and contact material provide an association name, telephone contact, social links, and service descriptions, while the supplied content does not show a license number, regulatory authorization, or formal registration disclosure. This is a transparency item for ordinary identity and service validation, not evidence of scam activity. The available third-party broker context produced no match and should be treated only as supporting reputational context, not as a licensing determination.

EVIDENCE

- The site's "Quem somos" and homepage content describe association and member-benefit activities rather than regulated financial products.
- The "Fale Conosco" content provides contact information and a contact form; analysis found one contact form with no sensitive fields or untrusted destination.
- The hosting record identifies AS26337, OIS1 - Oso Grande IP Services, LLC, US.
- The site uses a valid DV TLS certificate issued by YR2, valid through 2026-10-21.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm the association's legal identity and current contact details through an offline or independently sourced channel. Membership terms should be reviewed for fees, renewal conditions, cancellation rights, and the exact services supplied by partner clinics or facilities. Where a regulated service is implied by a specific partner, that partner's authorization should be checked directly with the relevant Brazilian registry, and payment should use a method providing appropriate consumer protections.

EVIDENCE

- The homepage lists member benefits and partner services that can be matched against the terms or membership documentation.
- The "Fale Conosco" page supplies the primary contact route and should be compared with an independently obtained contact record.
- The site exposes only a contact form rather than a password or payment form in the observed capture.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established, apparently legitimate association website. The classification supports ordinary browsing and routine site interaction, while operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves to a single hosting address, with no CDN edge or origin candidates identified in the observed network posture. The hosting environment is treated as a mitigating technical signal only and does not independently establish the operator’s identity.

Closing Assessment

Ordinary use is proportionate to the assessed posture; independent identity, membership-term, and payment-protection checks should be completed before credentials or funds are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about afoshaclass.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
