

Is africamissions.ca a scam? TrustSniffer's high-risk assessment: 0/100

africamissions.ca

Verdict

0

OUT OF 100

CRITICAL RISK

africamissions.ca shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Africa Missions (faith-based nonprofit) offering information about programs, contact details, donation calls-to-action, and account login/signup to track donations. Contact phone, email, and address are listed.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK

The page as captured

<https://africamissions.ca/>

What africamissions.ca served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Africa Missions presents itself as a faith-based nonprofit organization focused on missionary support and community programs, including water and sanitation, feeding, and shelter initiatives. The site solicits donations, facilitates volunteer or partner engagement, and offers supporter account registration and login for tracking donation status.

Scam/Impersonation Risk

The site's charitable presentation and page content are internally consistent, with no page-level red flags, detected brand impersonation, or suspicious browser behavior reported. However, this benign presentation is materially contradicted by external threat intelligence: the domain is reported as malicious by multiple evaluated sources, including Fortinet and Sophos, and is confirmed on external blacklists. This is a confirmed **blacklist** signal rather than merely a soft reputational concern. The contradiction is especially significant because the site offers donation-related activity and account login, creating sensitive interaction exposure despite the absence of obvious phishing mechanics in the captured page.

EVIDENCE

- The homepage is categorized as a nonprofit and donation site and contains login, signup, and donation forms; no page-level red flags were identified.
- External scanning recorded 14 malicious detections, with Fortinet and Sophos among the flagged vendors.
- Blacklist status is confirmed by the listed sources VT and EXTERNAL_BLACKLIST; Google Safe Browsing was recorded as non-malicious.
- The domain's registration record shows creation on 2007-01-23 and an age of 19.58 years, while historical analysis reports no confirmed suspicious repurposing or semantic drift.

Regulatory Verification Notes

The available content describes a nonprofit donation model but does not state a licensing authority or registration number. That omission is a regulatory and transparency verification gap, not by itself evidence of a scam; nevertheless, the operator's real-world identity remains independently unverified. The domain's long registration continuity and valid transport encryption are positive technical facts, but they do not resolve the external blacklist contradiction or establish the organization's legal standing. No matching third-party broker record was identified, although that context is not a legal or charitable-registration determination.

EVIDENCE

- The homepage identifies the organization as "Africa Missions" and presents donation, missionary-support, water-and-sanitation, feeding, and shelter-program content.
- The available pages do not provide a licensing authority or registration number for independent regulatory confirmation.
- The domain was registered through eNom Canada Corp. on 2007-01-23 and is recorded as 19.58 years old.
- The site is hosted on AS31898, ORACLE-BMC-31898 – Oracle Corporation, US; its TLS certificate is issued by YR2 at DV validation level and is valid through 2026-11-04.

What to Verify Next

Before any sensitive interaction, the organization's charitable registration and legal name should be confirmed through the relevant Canadian or applicable jurisdictional registry, using independently sourced records rather than links or contact details supplied solely by the site. Donation payment instructions should be checked against the confirmed organization and assessed for payment-protection, refund, and receipt controls. Official contact channels should also be confirmed through an independent, offline route, and account credentials should not be reused from other services.

EVIDENCE

- The homepage states that registered users can track payment status and confirmation, making account and donation controls directly relevant to verification.
- The contact page and homepage provide organizational contact details that can be compared with independently obtained registry information.
- The site's transport encryption is DV-only, so the certificate confirms encrypted delivery but not the legal identity of the operator.

Summary Verdict

The available evidence supports a **critical trust posture with sensitive-interaction risk**. Although the site presents a coherent nonprofit profile and some technical continuity signals, the confirmed external blacklist and malicious detections are decisive contradictions, while operator identity remains unverified.

Infrastructure Integrity

The site resolves to one identified IP associated with AS31898 and Oracle Corporation in the United States; no CDN was detected, and the infrastructure record includes a likely origin address. Oracle hosting is a neutral infrastructure fact rather than proof of legitimacy, and the absence of a detected CDN provides no additional protective mitigation.

Closing Assessment

Use should be restricted to passive review until the organization's identity, charitable status, payment arrangements, and official communication channels have been independently confirmed; account, credential, and financial interactions should not proceed beforehand.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of africamissions.ca.

- The request stayed on africamissions.ca. It was not redirected to another domain. [CLEAR](#)
- Registration is published under eNom Canada Corp.. [CLEAR](#)
- DNS for this domain is served by microsoftonline.com, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-01-23. [NOTED](#)
- The earliest public archive of this site is from 2008-06-07. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [africamissions.ca](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
