- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Afropolitain Magazine is a content-driven online publication covering fashion, beauty, culture, music, lifestyle, and news, with an integrated shop, magazine issues for purchase, advertising, affiliate partnerships, and newsletter subscriptions as its apparent business model.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity contradiction was observed. The homepage presents a coherent editorial publication with named sections, cover stories, current articles, a shop, and newsletter functionality rather than a deceptive financial or credential-harvesting proposition. Browser observations included substantial external activity and console errors, but no cloaking, hidden forms, wallet connections, wallet-draining behavior, clipboard manipulation, or suspicious inline scripts were detected; these technical irregularities therefore do not alter the low-risk interpretation. The site's apparent identity is consistent with an established publication, although the real-world operator is not independently verified.

EVIDENCE

- The homepage identifies “Afropolitain Magazine” and presents News, Fashion, Beauty, Culture, Lifestyle, Shop, Music, and Events sections.
- The homepage contains two forms limited to newsletter signup and account registration/sign-in, with no sensitive form or untrusted submission destination detected.
- Browser behavior recorded 428 external XHR requests, 31 non-whitelisted external requests, 25 console errors, and 0 wallet-connect, wallet-sensitive, wallet-drainer, or clipboard-hijack events.

Regulatory Verification Notes

The site operates as a media and commerce publication rather than presenting itself as a regulated financial service, and no regulated-service license is claimed in the supplied site evidence. Accordingly, licensing is not a scam indicator here, but the legal basis for any commercial transaction should be assessed through the site's merchant, terms, returns, and payment disclosures. Available external reputation checks found no adverse broker-reputation match, while page-authority evidence places the site in a mid-level authority band for explanation rather than as a regulatory determination.

EVIDENCE

- Domain registration records show creation on 2012-02-22 and an age of 14.5 years; registrar: GoDaddy.com, LLC.
- The site's hosting sensor identified AS54113, FASTLY - Fastly, Inc., US.
- TLS is valid and uses DV validation, issued by Certainly Intermediate R1, with validity through 2026-09-03.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant identity associated with the shop, review the applicable returns and order-support terms, and ensure that the chosen payment method provides appropriate buyer protection. Where a transaction involves a regulated activity rather than ordinary magazine or merchandise purchasing, confirm the relevant authorization directly with the applicable official registry. Contact channels should also be confirmed through an independent route before resolving material account or payment issues.

EVIDENCE

- The homepage provides both account access and direct commerce functionality, making merchant and account-service checks relevant before transactional use.
- The supplied evidence does not independently connect the website to a verified real-world operator.
- The publication's business model includes advertising, affiliate partnerships, newsletter subscriptions, and direct product sales.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No contradictory abuse, phishing, impersonation, or identity signals were observed, but the operator's

real-world identity remains independently unverified.

Infrastructure Integrity

The site benefits from CDN/WAF protection, which is a mitigating control against direct exposure of the origin environment but is not proof of legitimacy. Infrastructure resolution identified DigitalOcean, LLC in the US as the hosting provider, with observed traffic associated with a CDN edge and no origin candidate identified.

EVIDENCE

- Infrastructure records identify AS14061, DigitalOcean-ASN - DigitalOcean, LLC, US.
- One CDN edge IP was observed: 178.128.137.126; no likely origin IP candidate was identified.
- The infrastructure record marks the CDN as trusted and the site as protected by CDN/WAF services.

Closing Assessment

Ordinary browsing is proportionate to the evidence; before submitting credentials or making a purchase, independent confirmation of merchant identity, transaction terms, and payment protection should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of afropolitain.com.

- The request stayed on afropolitain.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-22. NOTED
- The earliest public archive of this site is from 2004-04-14. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about afropolitain.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
