Full analysis

Overview

A government public-service website presenting the Italian tax agencies Agenzia delle Entrate and Agenzia delle Entrate-Riscossione, with information and online access for pre-filled tax declarations, tax and debt-payment administration, and digital domiciliation; its apparent purpose is to provide publicly funded administrative services rather than commercial products.

Scam/Impersonation Risk

No contradictions were observed. The homepage identifies the two agencies and the Ministry of Economy and Finance, uses a government-domain context, and presents coherent public-service content without phishing indicators, malicious detections, brand-impersonation findings, or suspicious forms. The available evidence therefore supports an apparently legitimate, established site, while the real-world operator identity remains likely rather than independently proven.

EVIDENCE

- The homepage is titled “Due Agenzie al servizio del Paese - Agenzia Entrate - Agenzia Entrate Riscossione” and identifies Agenzia delle Entrate, Agenzia delle Entrate-Riscossione, and the Ministry of Economy and Finance.
- The domain was registered on 2022-07-07 and is approximately 4.1 years old.
- Web archives contain 40 snapshots spanning 2025–2026, covering 2 years; the available archival coverage is limited but shows no detected repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist finding.

Regulatory Verification Notes

The site presents a clear government-agency function and identifies the relevant institutions, rather than offering a privately marketed financial or investment service requiring a commercial license. The page-level material contains no red flags, and the assessed operator identity is consistent with the institutional presentation but is not independently verified. Registration records name Agenzia delle Entrate - Riscossione as the organization and Reevo s.p.a. as registrar; these records support provenance but do not, by themselves, establish operational control. The absence of a conventional commercial license number is therefore not a scam indicator, but the institutional relationship should still be confirmed through an authoritative government channel before sensitive interactions.

EVIDENCE

- Registration records list Agenzia delle Entrate - Riscossione as owner and organization, with Reevo s.p.a. as registrar.
- The homepage links to the agencies' service areas, reserved area, services, and contact section, and identifies the agencies' public-administration purpose.
- The site is served from AS20940, identified as AKAMAI-ASN1 - Akamai International B.V., NL.
- The TLS certificate uses issuer YR1, validation level DV, and is valid to 2026-10-28.

What to Verify Next

Confirm that the domain is reached from an independently sourced Italian government portal or official institutional communication, rather than from an unsolicited message or advertisement. For any payment or account action, confirm the relevant service name, destination, and payment-protection controls within the official government workflow; where identity or authority must be established, use contact details obtained independently from an authoritative public source.

EVIDENCE

- The homepage provides internal routes to "servizi," "area riservata," and "contatti."
- The page exposes no login form, hidden sensitive form, password-external destination, or untrusted form destination in the observed capture.
- The site links to institutional social channels including LinkedIn, X, and YouTube.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate government website and supports a high-trust, low-risk posture. No evidence of scam activity, phishing, impersonation, or conflicting institutional identities was observed, although the operator connection should be regarded as likely rather than proven independently.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, with observed addresses belonging to Akamai edge servers and no origin candidate identified in this analysis. This is a meaningful exposure-reduction measure and a mitigating infrastructure signal, but CDN protection alone is not proof of legitimacy.

Closing Assessment

Normal informational use is proportionate to the assessed posture; before credential submission or payment activity, ordinary independent checks of the official institutional route and applicable payment protections should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about agenziaentrateriscossione.gov.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
