

Is agfenix.com.br safe? TrustSniffer's low-trust assessment: 40/100

agfenix.com.br

Verdict

40

OUT OF 100

LOW TRUST

agfenix.com.br is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Website for Fenix Agência Digital, an established (since 2015) Brazilian digital marketing agency offering paid traffic, social media, branding and website development services. Contains service descriptions, case studies, contact details and a blog.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What agfenix.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

agfenix.com.br presents Fenix Agência Digital as a Brazilian digital-marketing agency offering paid-traffic management, social-media management, branding, website construction, case studies, client access, contact options, and a blog, with revenue apparently derived from service contracts, project work, and recurring management retainers.

Scam/Impersonation Risk

A confirmed external blacklist hit creates a material contradiction to the otherwise coherent agency presentation and drives an elevated risk posture for sensitive interaction. No brand-impersonation indicators, phishing forms, wallet-connect activity, hidden forms, or suspicious browser behavior were observed in the supplied page and behavior evidence; however, those benign observations do not offset the confirmed reputation signal. The site's apparent business model is conventional, but the identity remains unverified and the available evidence does not establish that the presented agency is the real-world entity responsible for the domain.

EVIDENCE

- The homepage presents Fenix Agência Digital as a marketing-services provider covering paid campaigns, social media, branding, and website development.
- External reputation analysis records a confirmed blacklist hit for the domain; separate page and browser analysis found no detected brand impersonation or phishing form.
- The domain was registered on 2021-06-17 and is approximately 5.18 years old, with an expiry date of 2028-06-17.
- Web-archive records contain 347 snapshots from 2020-04-06 through 2026-05-21, covering 7 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The site describes commercial marketing services rather than a regulated financial offering, so the principal verification issue is business identity and disclosure rather than a demonstrated licensing breach. The supplied content does not show a license claim or license number, and the on-page disclosure state is unclear; independently connecting the site to a real-world operator therefore remains unresolved. The site's contact details, service descriptions, cases, and client portal provide operational context, but they are self-published claims and should not be treated as independent corporate verification. No broker match was identified in the supplied third-party context.

EVIDENCE

- The homepage and service pages describe paid traffic, social-media management, branding, and website-construction services without presenting a regulatory license or registration number.
- The site's transport encryption uses a certificate issued by YR2 with DV validation, valid to 2026-10-05.
- Hosting telemetry identifies AS31898, ORACLE-BMC-31898 / Oracle Corporation, US.

What to Verify Next

Before credentials, payment, or contractual commitment are provided, independently confirm the operator's legal name, business registration, invoicing details, and authority to represent the Fenix Agência Digital brand through official records and an independently sourced contact route. Obtain references for the stated client work and validate that proposed statements of work, payment instructions, and client-portal access correspond to the independently confirmed entity. Confirm official support and contact channels through an offline or separately sourced route.

EVIDENCE

- The homepage claims "+150" projects delivered, "+80" clients served, "+6" years in the market, and "98%" customer satisfaction; these claims require independent substantiation before reliance.
- The site offers a "Portal do Cliente" and a "Fale com um especialista" contact path, creating identifiable channels for independent confirmation of ownership and service arrangements.
- The site presents case studies and a blog, which can be compared against independently attributable client references and dated business records.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The website has a coherent commercial presentation and technically stable page behavior, but the confirmed reputation contradiction and unresolved real-world identity association prevent it from being treated as a dependable basis for credential, payment, or contractual engagement.

Infrastructure Integrity

The site is directly hosted through Oracle Corporation infrastructure, with no CDN detected and no candidate origin-separation layer identified. This provides a clear hosting path but does not supply the protective mitigation that a CDN or WAF could provide; infrastructure characteristics alone do not establish legitimacy.

EVIDENCE

- Resolved hosting infrastructure: one unique IP, no edge IPs, no detected CDN, and no candidate origin IPs.
- Hosting provider: ORACLE-BMC-31898 - Oracle Corporation, US; ASN AS31898.
- The site's TLS certificate is DV-validated and issued by YR2, with validity ending 2026-10-05.

Closing Assessment

Until independent identity and reputation checks are complete, interaction should remain limited to non-sensitive, read-only review, with no submission of credentials, payment details, or consequential business information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about agfenix.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
