

Is agh.edu.pl safe? TrustSniffer's moderate-trust assessment: 65/100

agh.edu.pl

Verdict

65

OUT OF 100

MODERATE TRUST

agh.edu.pl is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official website of Akademia Górniczo-Hutnicza (AGH) in Poland. Contains organizational information, news, events, study offers, research highlights, campus details, and contact resources. Typical public university informational site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What agh.edu.pl served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Safe for Read-Only.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the public institutional site of Akademia Górniczo-Hutnicza (AGH) in Poland, presenting information about university leadership, academic departments, study programmes, research, events, campus facilities, admissions, and administrative contacts. Its apparent purpose and operating model are informational and educational, consistent with a public university rather than a commercial or financial service.

Scam/Impersonation Risk

No contradictions were observed. The available evidence shows no confirmed phishing behavior, malicious content, suspicious interactive behavior, or established impersonation of another institution. An automated similarity signal associated the site with the unrelated domain label "g.page," but the AGH-specific institutional content, absence of phishing indicators, and lack of confirmed impersonation mean that signal does not establish brand impersonation. The site does publish a substantial institutional structure, including leadership, organizational units, history, documents, study information, research, and contact resources, which is consistent with its stated academic purpose.

EVIDENCE

- The homepage identifies Akademia Górniczo-Hutnicza and provides university, research, study, campus, and contact navigation.
- The homepage contains one cookie-consent form, with no login form, payment form, hidden form, wallet connection, or sensitive-data submission flow detected.
- External reputation checks recorded 0 malicious results, 0 suspicious results, and 0 abuse reports; the domain was ranked 17,729 and was within the global top 1 million.

Regulatory Verification Notes

The website's legal and identity presentation is institutionally detailed on-page, with leadership, organizational, historical, documentary, and contact sections. However, the available evidence does not independently verify the real-world operator behind those on-page claims, so legitimacy is best described as apparent and evidence-consistent rather than conclusively proven. The site does not present a financial-services licence or registration number; given the sampled content is educational and administrative rather than an offering of regulated financial products, this is a disclosure point for confirmation rather than evidence of fraud. Transport security and the academic hosting context provide additional technical support for an established institutional presence.

EVIDENCE

- The site is served from AS8267, CYFRONET-AS – Academic Computer Centre CYFRONET AGH, PL.
- The site uses an OV TLS certificate issued by GEANT TLS RSA 1 to Akademia Górniczo-Hutnicza im. Stanisława Staszica w Krakowie, valid to 2027-02-25.
- The homepage and contact-related navigation present university leadership, organizational units, administrative services, and institutional contact resources.

What to Verify Next

Before sensitive or high-value activity, an institution's domain ownership and the relevant contact details should be confirmed through an independently sourced AGH publication or an offline channel, rather than relying solely on the website itself. Any transaction, credential request, or external portal reached from the site should be checked against the university's independently verified official channels and the applicable institutional process.

EVIDENCE

- The homepage provides links to leadership, administration, documents, organizational units, and contact resources that can be cross-checked independently.
- The site presents study, research, admissions, campus, and administrative information, allowing the proposed interaction to be matched against a normal university process.
- The site's transport certificate identifies the named AGH subject organisation and has a stated validity period through 2027-02-25.

Summary Verdict

The site has a **moderate-trust posture** with no observed scam or impersonation contradiction. Its content, institutional structure, academic context, clean technical observations, and established public-facing footprint are

consistent with an apparently legitimate university website, while independent operator verification remains incomplete.

Infrastructure Integrity

The site resolves to two likely origin addresses and does not appear to use a detected CDN or WAF edge layer. Hosting is provided through CYFRONET-AS, the Academic Computer Centre CYFRONET AGH, which is a contextually consistent infrastructure choice; this supports, but does not independently prove, institutional legitimacy.

Closing Assessment

Routine informational and read-only use is proportionate to the available evidence, while independent confirmation should precede credential submission, payment, or other sensitive and high-value actions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of agh.edu.pl.

- The request stayed on agh.edu.pl. It was not redirected to another domain. CLEAR
- It is hosted on CYFRONET-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about agh.edu.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
