Full analysis

Overview

This website is the Vietnamese Agribank banking portal, presenting retail, corporate, and financial-institution services such as deposits, savings, loans, cards, payments, rates, customer support, and company information. Its apparent business model is conventional banking rather than speculative investment activity.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent institutional banking purpose, while the domain has sustained historical continuity and the external reputation checks found no malicious or suspicious detections. Normal interaction, including account login and standard use, is appropriate.

- Domain age: 19.540041067761805 years; first archive record dated 2007-01-16T08:39:56Z.
- Web archive: 806 snapshots spanning 2007–2026, covering 20 tracked years.
- Homepage analysis identified no phishing indicators, hidden forms, or brand-impersonation signals.
- External reputation checks recorded 0 malicious and 0 suspicious detections; blacklist status was false.

Regulatory Verification Notes

The available site content clearly identifies Vietnam Bank for Agriculture and Rural Development and provides company-information, recruitment, network, support, and banking-service areas. A license or registration number is not surfaced in the supplied page content, so regulatory status remains a transparency item for independent confirmation rather than an indication of deception. No contextual third-party broker match was identified.

- Homepage title identifies “Ngân hàng Nông nghiệp và Phát triển Nông thôn Việt Nam.”
- Hosted on AS55306, AGRIBANK-AS-VN, Vietnam Bank for Agriculture and Rural Development, VN.
- TLS certificate issued by GeoTrust TLS RSA CA G1, OV validation, valid to 2026-11-06T23:59:59+00:00.
- The homepage exposes company-information, recruitment, network, support, deposit, lending, payment, and corporate-banking sections.

What to Verify Next

For institutional onboarding or material transactions, independently confirm the entity’s current authorization and registration details through the relevant Vietnamese regulatory or corporate registry. Confirm official support and service channels through an independently sourced institutional contact route.

- The site provides dedicated company-information and support navigation suitable for registry and contact-channel cross-checking.
- The site presents distinct retail, corporate, and financial-institution service areas.
- The available evidence does not supply a license number or licensing authority for direct comparison.

Summary Verdict

The website presents as a legitimate, established, and trustworthy banking entity with strong convergence across identity, historical continuity, technical integrity, content coherence, and external reputation. Its overall posture supports normal business use and standard account interaction.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF; resolution identified two likely origin addresses and no edge IPs. This is a direct-hosting posture and does not contradict the site’s established institutional identity.

Closing Assessment

Prospective users may proceed with normal account and service interactions, applying routine organizational controls for material financial activity.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about agribank.com.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
