

Is agroexportavocados.com a scam? TrustSniffer's high-risk assessment: 0/100

agroexportavocados.com

Verdict

0

OUT OF 100

CRITICAL RISK

agroexportavocados.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing/landing page for an agricultural export company promoting Hass avocados and guacamole products, highlighting 20 years of experience. No forms or transactional flows visible in supplied DOM.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://agroexportavocados.com/>

What agroexportavocados.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a corporate-style landing page for “AGROEXPORT INTERNACIONAL,” presenting Hass avocados, fresh-food exports, and guacamole products associated with the names Villita Fresh Foods and Villita Avocados. Its apparent business model is B2B agricultural export and produce contracting rather than direct online retail or financial services.

Scam/Impersonation Risk

Contradictory external reputation signals were observed, including a confirmed blacklist status and multiple malicious or suspicious detections. These signals materially outweigh the homepage's otherwise ordinary agricultural-business presentation. The supplied page evidence does not show a login form, credential-collection flow, payment form, hidden form, wallet connection, or other active phishing mechanism, and no specific brand impersonation was identified; however, the external detections create a significant risk for sensitive interaction. The domain's long registration history and recorded archival presence provide provenance context but do not neutralize the current reputation warnings.

EVIDENCE

- The homepage presents “AGROEXPORT INTERNACIONAL,” Hass avocado exports, guacamole, and a stated 20 years of industry experience, with no transactional or credential-collection flow visible.
- External reputation checks recorded a blacklist hit and multiple malicious or suspicious detections associated with the website.
- Domain registration: 2005-09-05; age 20.97 years.
- Web archive depth: 103 snapshots spanning 2009–2026, with 18 years tracked.

Regulatory Verification Notes

The identity material is limited to the corporate and product presentation on the homepage, which names “AGROEXPORT INTERNACIONAL,” “Villita Fresh Foods,” and “Villita Avocados.” Those names are site-level claims and do not independently verify the real-world operator. No license, licensing authority, or registration number is disclosed in the supplied business presentation; this is a regulatory-transparency gap rather than, by itself, proof of fraud. The available evidence is therefore insufficient to confirm the entity’s legal status, export authorization, food-safety credentials, or contracting authority.

EVIDENCE

- The homepage identifies the business through the names “AGROEXPORT INTERNACIONAL,” “Villita Fresh Foods,” and “Villita Avocados.”
- The supplied page content contains no stated licensing authority or registration number.
- The site’s transport encryption uses a TLS certificate issued by YR1 with DV validation, valid to 2026-11-14T22:16:59+00:00.

What to Verify Next

An institution considering engagement should independently confirm the operating company and export authorization through the relevant corporate, agricultural-export, and food-safety registries in the jurisdictions involved. Contact details should be validated through an independently sourced business record or an offline channel, and any proposed purchase or supply agreement should be checked against independently verified company banking, invoicing, trade-reference, and shipment documentation. Until those checks are complete, sensitive credentials and financial commitments should not be provided.

EVIDENCE

- The homepage is a marketing presentation rather than a documented transaction or contracting portal.
- The site supplies product and experience claims but does not provide the regulatory identifiers needed for independent licensing confirmation.
- The supplied technical and reputation evidence warrants independent validation before any sensitive engagement.

Summary Verdict

The website carries a **critical sensitive-interaction risk** despite presenting as a conventional agricultural-export business. Its apparent commercial purpose is not sufficient to establish operator identity or legitimacy,

and the confirmed external reputation contradictions require a strongly cautionary treatment for enterprise engagement.

Infrastructure Integrity

The site resolves to a single likely origin address without a detected CDN or WAF layer. It is hosted by ONIAAS - HostPapa, US, on AS40092; this infrastructure is a normal hosting arrangement but provides no independent legitimacy assurance.

EVIDENCE

- Hosting infrastructure: AS40092, ONIAAS - HostPapa, US.
- One unique IP was identified, with zero edge IPs and one likely origin IP.
- No CDN was detected in the supplied infrastructure assessment.

Closing Assessment

The proportionate course is to restrict the site to passive, non-sensitive viewing while independently confirming the counterparty through authoritative records and established offline channels before proceeding with credentials, contracts, payments, or other consequential activity.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
• No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of agroexportavocados.com.

- The request stayed on agroexportavocados.com. It was not redirected to another domain. CLEAR
- Registration is published under Internet Domain Service BS Corp.. CLEAR
- DNS for this domain is served by hostpapavps.net, across 2 name servers. NOTED
- The registration is paid up to 2027-09-05. NOTED
- The earliest public archive of this site is from 2009-08-16. CLEAR
- It is hosted on ONIAAS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about agroexportavocados.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
