

Is ahanacraft.com a scam? TrustSniffer's high-risk assessment: 0/100

ahanacraft.com

Verdict

0

OUT OF 100

CRITICAL RISK

ahanacraft.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Ahana Craft is a Nepal-based online shop selling handmade felt goods and beaded jewelry. The page includes product listings, account login/registration and contact details (phone, email, physical address). No obvious phishing, crypto, or high-yield investment claims are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://ahanacraft.com/

What ahanacraft.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Ahana Craft is an online retail storefront presenting handmade Nepalese felt crafts, bags, footwear, rugs, woolen products, and beaded accessories for direct purchase through a standard ecommerce model with customer accounts and checkout.

Scam/Impersonation Risk

The site's presentation is consistent with a small handmade-goods retailer, and the available page content contains no apparent crypto, investment, phishing, or brand-impersonation claims. Nevertheless, the domain is subject to a confirmed blacklist designation supported by malicious external detections, including detections from two established security vendors; this is a material contradiction to the otherwise ordinary storefront presentation. Browser testing also recorded suspicious network classification, substantial post-interaction document changes, and elevated console errors around pages containing login, registration, and checkout functionality. The appropriate posture is therefore to treat sensitive interaction with the site as unsafe until the external detections are independently resolved.

EVIDENCE

- External reputation testing recorded 10 malicious detections and 1 suspicious detection across 16 evaluated results; the domain was also marked by Fortinet and Sophos.
- The homepage and account interface expose login, registration, and checkout forms; behavioral testing recorded 15 external XHR requests, 7 external POST requests, 31 console errors, and a maximum post-interaction DOM difference of 3,613.
- Domain registration records show creation on 2010-10-28, with an age of 15.82 years.
- Historical records in the supplied analysis show 85 archive snapshots spanning 2011–2026, covering 16 tracked years.

Regulatory Verification Notes

Ahana Craft appears to operate as a consumer-goods retailer rather than a financial service, and the available content provides product categories, a telephone number, email contact, and a physical address. The site does not present a financial-services license, registration number, or regulator attribution; for an ordinary goods retailer this is primarily a business-identity and disclosure matter rather than evidence of a scam. The available evidence supports only a likely connection to the presented brand, not independently verified operator identity. The external broker-intelligence dataset produced no match and should not be interpreted as a licensing or regulatory finding.

EVIDENCE

- The homepage identifies the business as “Ahana Craft” and describes Nepal handmade felt crafts and accessories.
- The contact content provides a telephone number, email contact, and physical address, but no regulator, license number, or registration attribution.
- The domain is registered through GoDaddy.com, LLC; the recorded registrant organization is Domains By Proxy, LLC.
- Hosting telemetry identifies AS14670, WHG-USE1 – WHG Hosting Services Ltd, GB; the TLS certificate is issued by YR2 at DV validation level and is valid through 2026-11-10.

What to Verify Next

Before any credential submission, account creation, or payment, an independent party should confirm that the merchant's legal name, physical address, telephone contact, returns process, and fulfillment arrangements correspond to a real operating business. Payment should be limited to methods offering meaningful dispute and recovery protections, and any business or trade registration relevant to the seller's jurisdiction should be checked through the applicable official registry. Official support channels should also be confirmed through an independently obtained contact route rather than relying solely on information displayed on the site.

EVIDENCE

- The storefront supports direct product purchasing, customer registration, and checkout, creating both credential and payment exposure.
- The site links to Facebook, Twitter, and Instagram accounts that can be checked for consistent business history and contact information.
- The homepage contains product listings and shipping-related information that can be compared with independently sourced merchant details.

Summary Verdict

The overall posture is **critical trust risk**. Although the website has a coherent retail presentation and a long-running domain history, the confirmed blacklist status and malicious external detections materially outweigh those benign content characteristics. Identity remains likely rather than independently verified, so the site should not be treated as a trusted destination for sensitive interaction.

Infrastructure Integrity

The site resolves directly to one likely origin IP, 181.214.142.9, in the United Arab Emirates, and no CDN or WAF edge layer was detected. The hosting environment is identified as WHG-USE1 – WHG Hosting Services Ltd, GB, on AS14670; the valid DV TLS certificate provides transport encryption but does not establish merchant legitimacy or offset the external reputation risk.

Closing Assessment

Sensitive use should be suspended pending independent confirmation of the merchant and resolution of the external security detections; any subsequent engagement should use strong payment protections and a unique password not used elsewhere.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ahanacraft.com.

- The request stayed on ahanacraft.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by nepalwebsitedesign.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-28. NOTED
- The earliest public archive of this site is from 2011-03-22. CLEAR
- It is hosted on WHG-USE1, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ahanacraft.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
