Full analysis

Overview

Aich Appraisers Auctioneers and Valuers is a corporate service website presenting professional appraisal, auctioneering, valuation-report, and asset-management services for businesses, financial institutions, and individuals.

Scam/Impersonation Risk

The site's visible content is a conventional corporate-services presentation and does not show login forms, payment flows, wallet functionality, suspicious scripts, or page-level brand-impersonation indicators. However, that benign presentation is outweighed by multiple external malicious detections and a confirmed blacklist hit, creating a material risk for sensitive interaction. No conflicting legal-entity names were observed across the supplied page content, but the external reputation contradiction remains decisive; the site should therefore be treated as unsuitable for credentials, account access, or financial transactions.

EVIDENCE

- The homepage describes appraisal, auctioneering, valuation reports, and asset liquidation, with no sensitive forms or external submission destinations detected.
- External reputation checks recorded 10 malicious detections and a confirmed blacklist hit.
- The domain was registered on 2014-05-29 and is approximately 12.24 years old, indicating registration continuity but not establishing that the current operator is trustworthy.

Regulatory Verification Notes

The homepage and company information describe services for banks, NBFCs, financial firms, manufacturers, real-estate interests, and other institutions, while claiming certified expertise, compliant valuation reports, confidentiality, and ethical practices. Those claims are not independently verified in the supplied evidence. No license, licensing authority, or license number is claimed on the site, and the available disclosure state is unclear; this is a regulatory-transparency gap rather than, by itself, proof of fraud. The website's identity is not independently verified, so the stated business identity should not be treated as proven. Its domain registration is recorded through Dreamscape Networks International Pte Ltd, and its transport encryption uses a known certificate issuer, but neither fact validates the operator or its professional authorization.

EVIDENCE

- The homepage states that valuation reports are intended for legal, financial, and insurance purposes and refers to certified experts.
- The company information identifies appraisal and valuation work for corporates and financial institutions but does not provide a licensing authority or license number.
- The site uses a DV TLS certificate issued by WR1, valid to 2026-10-03.

What to Verify Next

Before any sensitive engagement, an independent check should confirm the legal entity, responsible professionals, office details, and authorization to provide appraisal or auctioneering services through the relevant professional or governmental registry. Contact details should be validated through an independently obtained channel rather than relying solely on the website, and any proposed payment or contractual arrangement should use documented protections, invoice verification, and a reversible payment method. Until those checks are complete, interaction should remain limited to non-sensitive review.

EVIDENCE

- The About and company-information pages provide the stated service scope and institutional customer claims that require registry-level confirmation.
- The contact and office-address information provides a basis for independent confirmation of the operating entity and physical presence.
- The site's transport-encryption status confirms encrypted delivery, but does not verify professional licensing or operator identity.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents an ordinary corporate-services profile and has some basic technical and registration continuity indicators, the confirmed external reputation contradiction prevents the site from being treated as trustworthy for sensitive interaction. The apparent business identity remains unverified.

Infrastructure Integrity

The site resolves through AS47583, operated by AS-HOSTINGER — Hostinger International Limited, CY, with infrastructure located in GB. No CDN was detected; two likely origin addresses were identified, so the hosting arrangement provides no meaningful CDN-based separation between the public service and origin infrastructure. This is a technical observation only and neither proves malicious control nor offsets the external reputation findings.

Closing Assessment

The site should be restricted to read-only review until independent identity, authorization, and contact validation are completed; account login, credential submission, and financial transactions should not proceed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aichappraisers.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
