

Is aifaceswap.io legit? TrustSniffer's high-trust assessment: 90/100

aifaceswap.io

Verdict

90

OUT OF 100

HIGH TRUST

aifaceswap.io appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

AI Face Swap is an online image and video face-swapping service that accepts user-uploaded facial images. It advertises free no-login image swapping and also offers accounts, purchasable credits, premium capabilities, related AI media tools, and API access. The page includes consent language against abusive uses and claims uploaded and generated images are removed after one day.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

AI Face Swap is an online media-editing service that processes uploaded facial images for image and video face swapping, alongside related AI-generation tools. It combines free, no-sign-up functionality with user accounts, purchasable credits, premium processing features, and API access.

Scam/Impersonation Risk

No phishing, impersonation, conflicting legal identity, or other contradictory signal was observed. The service presents a coherent SaaS business model: free face swapping leads into paid credits, premium upgrades, batch and longer-video processing, reduced queues, and API access. Its login and upload functions are consistent with that stated purpose, while observed browser interactions showed no hidden forms, credential forwarding, cloaking, clipboard manipulation, or cryptocurrency-wallet activity. The domain has an active, continuous history and a strong global traffic footprint, supporting the conclusion that this is an established and legitimate service rather than a transient imitation site.

- The homepage consistently identifies the service as an AI image and video face-swapping platform and explains its free and paid service tiers.
- The domain was registered in 2024 and is approximately 2.45 years old; registration began on 19 February 2024.
- The web archive contains 140 snapshots spanning 28 April 2024 to 20 July 2026, covering three tracked years without evidence of suspicious repurposing or semantic drift.
- External reputation telemetry recorded no malicious or suspicious detections, no threat-list hit, and a global traffic rank of 8,285.

Regulatory Verification Notes

The supplied homepage content does not establish a named operating legal entity or claim a regulatory licence. This is a minor corporate-disclosure limitation, not evidence of deception; an AI media-editing SaaS service does not ordinarily require the financial-services licensing applicable to brokers or payment firms. Domain registration uses GoDaddy and a proxy-registration service, which is a common administrative arrangement. The site also publishes consent language against abusive use and states that uploaded and generated images are deleted after one day, although that retention claim is not independently substantiated by the supplied material.

- The homepage presents product descriptions, usage instructions, policy material, and an abuse-reporting channel, but the captured content does not identify a licensing authority or licence number.

- The domain is registered through GoDaddy.com, LLC, with Domains By Proxy, LLC listed as the registrant service and an expiry date of 19 February 2027.
- The homepage states that uploaded and generated images are removed after one day.
- The available third-party broker dataset contains no matched broker profile; this is neutral contextual information rather than a licensing determination.

What to Verify Next

Enterprise adopters should review the full privacy terms and data-processing arrangements before authorizing facial-image uploads, focusing on retention enforcement, subprocessors, model-training use, deletion controls, and cross-border processing. Prospective API or premium customers should also confirm the contracting entity, billing terms, refund provisions, and official support channels through the service's published documentation. Organizations should obtain appropriate consent from depicted individuals and assess whether local biometric-data, likeness, or synthetic-media rules apply to the intended use.

- The homepage requires facial-image uploads, creating a privacy-sensitive processing relationship that warrants a formal data-handling review.
- The homepage offers accounts, credit purchases, premium upgrades, and API access, making contractual and billing terms relevant to paid adoption.
- The site's published consent language prohibits abusive uses, providing a basis for reviewing organizational use against its acceptable-use conditions.

Summary Verdict

The website is a legitimate, established, and trustworthy AI media service with coherent commercial operations, sustained public use, clean reputation evidence, and no observed identity or threat contradiction. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with all observed addresses belonging to edge infrastructure. This reduces direct origin exposure and provides mainstream network protection, although infrastructure controls are mitigating security measures rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., United States); four observed addresses were Cloudflare edge nodes.
- The site's transport encryption uses a valid WE1-issued domain-validated TLS certificate, valid until 22 October 2026.
- No origin-server candidate was exposed through the observed network resolution.

Closing Assessment

Prospective users may proceed with ordinary use, while organizations handling sensitive facial imagery or purchasing enterprise services should complete proportionate privacy, contractual, and acceptable-use due diligence.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aifaceswap.io.

- The request stayed on aifaceswap.io. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 2024-04-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aifaceswap.io at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
