

Is ainfinitytakeovers.com a scam? TrustSniffer's high-risk assessment: 0/100

ainfinitytakeovers.com

Verdict

0

OUT OF 100

CRITICAL RISK

ainfinitytakeovers.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

A Infinity Takeovers — a Jaipur-based talent, events and production agency offering services such as event production, talent & training, modeling/casting management, media promotions and brand partnerships. Contact email and phone numbers are provided; typical small-business marketing copy is present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What [ainfinitytakeovers.com](https://www.ainfinitytakeovers.com/) served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

A Infinity Takeovers is a Jaipur-based talent, events, and production agency presenting event production, talent management, modeling and casting, training, media promotion, and brand-partnership services to prospective clients and represented talent.

Scam/Impersonation Risk

The principal risk is external rather than the service description itself. Multiple security providers detected malicious characteristics, and the domain is listed on confirmed blacklists from two external sources. These signals materially conflict with the site's otherwise ordinary agency presentation and warrant treating sensitive interaction as unsafe. No conflicting legal-entity names, explicit brand impersonation, or phishing form were identified in the supplied page evidence.

EVIDENCE

- The homepage presents “A. Infinity Takeovers,” Jaipur location details, service categories, and a contact form, with no login or password-collection functionality observed.
- External reputation assessment recorded 4 malicious detections from 9 evaluated results and confirmed blacklist status across 2 sources.
- Domain registration telemetry: registered 2019-10-06; age 6.87 years.
- Web-archive telemetry: 284 snapshots spanning 2020-03-21 to 2026-05-15, covering 7 tracked years.

Regulatory Verification Notes

The site’s apparent business activity is a conventional agency model rather than a financial or regulated-service offering. However, independent identity verification remains incomplete, and the supplied site evidence does not show a licensing authority or registration number; this is a verification gap, not by itself proof of wrongdoing. The published identity should therefore be treated as an on-site claim pending confirmation through authoritative business records. A separate broker-reputation dataset recorded no match, which provides limited contextual reassurance but is not a licensing or legal finding.

EVIDENCE

- The homepage identifies the business as “A Infinity Takeovers” and states that it was established in 2019.
- The available business-model evidence records no claimed license authority or license number.
- Hosting telemetry: served from AS51167, Contabo GmbH, Germany; resolved infrastructure country: Lithuania.
- Transport telemetry: TLS certificate issued by YE1, domain-validated (DV), valid to 2026-11-17.

What to Verify Next

Before any sensitive engagement, independently confirm the agency’s legal existence, operating address, and contracting entity through the relevant Indian business or local commercial registry. Obtain a written service agreement identifying deliverables, fees, cancellation terms, and payment-recipient details, and confirm independently sourced contact channels rather than relying solely on the website. Any request for account credentials, identity documents, advance payments, or financial information should be evaluated only after those checks are complete.

EVIDENCE

- The homepage provides Jaipur, Rajasthan location information and operating hours that can be checked against independent records.
- The site exposes one contact form and no login form or hidden sensitive form in the observed page behavior.
- The page contains no disclosed licensing authority or registration number requiring validation.

Summary Verdict

The website presents a plausible small-business agency model and has sustained domain and archival continuity, but those positive characteristics do not offset the confirmed external malicious detections and blacklist status. The resulting posture is critical, with sensitive interaction risk and an independently unverified operator identity.

Infrastructure Integrity

The site resolves directly to a single likely origin endpoint rather than a CDN or WAF edge network. Hosting on Contabo infrastructure provides ordinary availability but does not supply a meaningful legitimacy assurance or compensate for the external reputation findings.

Closing Assessment

The appropriate near-term posture is passive review only; credentials, identity documents, and financial transactions should not be submitted unless independent organizational and transaction checks produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ainfinitytakeovers.com.

- The request stayed on ainfinitytakeovers.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by sabkhojgroup.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-06. NOTED
- The earliest public archive of this site is from 2020-03-21. CLEAR
- It is hosted on CONTABO, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ainfinitytakeovers.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
