Full analysis

Overview

AlInvest is an AI-powered investing research and market-data platform offering stock and cryptocurrency quotes, financial news, portfolio tracking, chart analysis, backtesting, desktop software, broker integrations, and premium AIME features through a subscription-oriented model.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage presents a coherent financial-research software business, and the available behavioral evidence shows no hidden forms, cloaking, wallet-drainer activity, or suspicious external destinations. External reputation checks also returned clean results, supporting the conclusion that the site is established and legitimate.

- The homepage identifies AlInvest as an AI investing, research, signals, charting, portfolio, and backtesting platform.
- Behavioral testing recorded no hidden sensitive forms, no wallet connection, no cloaking, and no suspicious scripts.
- External reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The site operates as a financial-research and software platform rather than presenting guaranteed investment returns. Its homepage promotes a free trial, premium AIME tools, market analysis, portfolio functions, a desktop terminal, cryptocurrency coverage including BTC, ETH, and USDT, and broker integrations; these features warrant clear separation between research, referrals, and any regulated execution or advice. Legal disclosures and contact information are present, but no licensing authority or license number is identified in the supplied evidence, leaving a limited regulatory-transparency item for confirmation. A third-party broker-intelligence comparison produced no match and should be treated only as contextual support.

- The domain was registered in 2016 and is approximately 10.37 years old; registrar: GoDaddy.com, LLC.
- Historical records contain 186 snapshots spanning 2000–2026, with 27 years tracked and no established evidence of suspicious repurposing.
- The site is hosted on AS14618 (AMAZON-AES - Amazon.com, Inc., US).
- TLS is issued by Go Daddy Secure Certificate Authority - G2, uses DV validation, and is valid through 2026-12-04.

What to Verify Next

Confirm any licensing or registration requirements applicable to the specific services used, review the legal and commercial terms governing subscriptions and broker relationships, and confirm official support channels through an independently sourced business contact route before relying on the service for consequential financial activity.

- The homepage describes subscription upgrades and broker integrations but does not identify a licensing authority or license number in the supplied content.
- The legal and contact pages are identified as present and should be reviewed for entity, service-scope, and jurisdiction details.
- The homepage’s “Trusted by 1M+ investors” statement is a marketing claim whose basis is not independently established in the supplied evidence.

Summary Verdict

The overall posture is that of an established, legitimate, and trustworthy website with no observed scam or impersonation contradictions. Normal interaction, including account login and standard account use, is appropriate.

Infrastructure Integrity

The observed hosting and transport posture is technically coherent and provides a modest mitigating signal. Infrastructure supports service availability and encrypted transport but does not independently establish business legitimacy.

Closing Assessment

Prospective users may use the service normally while applying ordinary independent judgment to consequential financial decisions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ainvest.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
