

Is airapps.co legit? TrustSniffer's high-trust assessment: 80/100

airapps.co

Verdict

80

OUT OF 100

HIGH TRUST

airapps.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing homepage for 'Air Apps' promoting a bundle subscription and multiple consumer apps (translation, calculator, VPN, scanner, productivity tools) with testimonials and claims of wide adoption.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	9% confidence AbuseIPDB, 5 reports; shared hosting inflates reports	CLEAR

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Air Apps is a consumer software and subscription website presenting AI-enabled mobile and web applications for translation, calculation, VPN, document scanning, productivity, and related everyday tasks. Its apparent business model is app distribution and the paid “Air Apps One” bundle, supported by an optional free trial and claims of broad user adoption.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent product-focused business model, standard navigation, user testimonials, and no credential-harvesting form, wallet interaction, phishing behavior, or brand-impersonation indicator. External reputation checks found no malicious or suspicious detections. Five abuse reports were associated with a shared network address attributed to Framer B.V.; the available attribution identifies shared infrastructure rather than activity by Air Apps, so this is a limited contextual signal rather than evidence of site-level abuse. The site therefore appears legitimate and low risk, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage is classified as a corporate/product showcase and contains no login form, hidden form, sensitive form, or untrusted form destination.
- The site's domain registration record shows creation on 2019-02-13 and an age of 7.5 years; the registrar is GoDaddy.com, LLC.
- Historical records contain 333 snapshots spanning 2013-04-16 to 2026-06-08, covering 14 tracked years with no detected suspicious repurposing.
- The domain has an established traffic footprint, with a recorded rank of 58036 and inclusion within the top one million sites.

Regulatory Verification Notes

The available material is consistent with an established software service, but it does not independently verify the legal entity operating the website. The site does not claim a regulated financial, investment, or brokerage license, and the supplied page material does not establish a licensing obligation for the consumer-app subscription model. Registration privacy is an administrative limitation rather than an identity contradiction. Before payment or credential interaction, the billing entity, subscription terms, cancellation process, and

consumer-protection arrangements should be confirmed through the site's published terms and independent app-distribution or merchant records.

EVIDENCE

- The registration record identifies the registrant organization as Domains By Proxy, LLC, with the owner shown as Registration Private.
- The site is served through AS16509, identified as AMAZON-02 - Amazon.com, Inc., US; the recorded hosting country is NL.
- Transport encryption uses a DV certificate issued by YE1, valid until 2026-10-08.
- The homepage provides About, Support, Careers, and Blog navigation, but the supplied material does not independently identify a verified operating entity or license number.

What to Verify Next

Before a paid subscription or credential submission, confirm the legal billing entity, trial-conversion terms, renewal pricing, cancellation method, refund policy, and applicable consumer protections in the site's terms and checkout flow. Independent confirmation should also be obtained from the relevant official app-store listing or an independently sourced company contact route; if the service is later presented as regulated or financial, its claimed authorization should be checked against the applicable regulator's register.

EVIDENCE

- The homepage explicitly offers "1 month free" alongside the Air Apps One subscription, making trial conversion and renewal terms material verification points.
- The site exposes Support and About navigation, providing relevant locations for checking service ownership and customer-service procedures.
- The supplied behavioral review recorded no sensitive form, external password form, wallet-provider detection, clipboard hijacking, or hidden form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. The classification is supported by coherent product content, sustained historical presence, clean reputation findings, and stable technical operation, while independent confirmation of the real-world operator remains incomplete.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and the observed addresses were CDN edge servers rather than identified origin candidates. This reduces direct origin exposure and is a mitigating security control, but it is not proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before credentials or payment are submitted, the prospective user should complete the independent merchant-identity, subscription-terms, return/refund, and payment-protection checks described above.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 31.43.160.6 (Framer B.V., Content Delivery Network), 9% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airapps.co.

- The request stayed on airapps.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-13. CLEAR
- The earliest public archive of this site is from 2013-04-16. CLEAR
- It is hosted on AMAZON-02, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airapps.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
