

Is airbnb.com.ar legit? TrustSniffer's high-trust assessment: 90/100

airbnb.com.ar

Verdict

90

OUT OF 100

HIGH TRUST

airbnb.com.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language Airbnb marketplace page listing accommodations, hotels and experiences with site navigation, listings and footer links to help/resources; standard commercial travel booking content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Spanish-language website presents itself as the Argentine Airbnb online travel marketplace, offering visitors short-term accommodation, hotel and experience listings, host onboarding, and booking-related help and policy resources through a conventional service-fee marketplace model.

Scam/Impersonation Risk

No scam, phishing, blacklist, or impersonation contradictions were observed. The homepage uses Airbnb branding and localized marketplace content, while the domain's historical continuity, standard travel-booking functionality, and clean external security results provide converging support for an established site; the brand-similarity signal therefore does not amount to a confirmed identity contradiction in this assessment. The apparent legitimacy is evidence-consistent, but the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage presents accommodation, hotel, experience, host, and help-related content with no reported fraud indicators or suspicious login mechanism.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist result.
- Domain age: 15.151266255989048 years; first archived 2011-06-18.

Regulatory Verification Notes

The site operates as a travel marketplace rather than presenting itself as a regulated financial service. The analyzed content includes links to privacy, terms, help, and policy resources, but no independently verified operator identity, licensing status, or registration number was established from the supplied material. This is a transparency and verification point—not evidence of a scam—and the absence of a broker-dataset match is only contextual reputational information. Available evidence is consistent with an established, apparently legitimate website, while formal operator attribution remains unverified.

EVIDENCE

- The homepage identifies the business model through listings for accommodation and experiences and host-related navigation.
- No license claim or license number is presented in the analyzed site content.
- The transport layer was served from AS20940 (AKAMAI-ASN1 - Akamai International B.V., NL).
- TLS uses DigiCert Global G3 TLS ECC SHA384 2020 CA1 with OV validation, subject organization Airbnb, Inc., valid to 2026-12-11.

What to Verify Next

Before credential or payment interaction, an organization should independently confirm that the booking counterparty and applicable merchant entity correspond to the intended Airbnb operation. The relevant terms, cancellation and refund provisions, dispute process, and payment-protection arrangements should be reviewed on the site, with contact channels confirmed through an independent official route where the transaction is material.

EVIDENCE

- The captured homepage contained no login form or sensitive input form.
- Behavioral testing found no hidden forms, password submissions to external destinations, wallet activity, or clipboard manipulation.
- The page exposed booking search controls for location, dates, and traveler count, supporting the stated marketplace function.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam or impersonation contradictions were observed, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure using Amazon.com, Inc. edge services in the United States, identified as AS16509; all observed addresses were CDN edge servers and no origin-server candidate was identified. This layered delivery architecture is a mitigating exposure-control measure, not independent proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to routine independent merchant-identity, booking-policy, and payment-protection checks before credentials or funds are committed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `airbnb.com.ar`.

- The request stayed on `airbnb.com.ar`. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2011-06-18. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `airbnb.com.ar` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
