

Is **airbnb.com.co** legit? TrustSniffer's high-trust assessment: **90/100**

airbnb.com.co

Verdict

90

OUT OF 100

HIGH TRUST

airbnb.com.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Localized Airbnb listings page in Spanish (Colombia currency), showing accommodations, prices, ratings, and travel destination categories. Footer links include help, terms, and company information. No obvious malicious or high-risk elements in the extracted text.

Evidence status and limitations

- Evidence completeness:

UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Spanish-language Airbnb travel marketplace presenting accommodation listings, prices in Colombian pesos, guest ratings, destination categories, and links for help, terms, and company information; its apparent business model is to facilitate accommodation and experience bookings while generating commission and reservation-related fees.

Scam/Impersonation Risk

No scam, phishing, blacklist, or impersonation contradictions were observed. The homepage content is consistent with a functioning travel marketplace, and the extracted page contained no login form, hidden sensitive form, untrusted form destination, wallet activity, or credential-harvesting indicators. An automated content assessment identified strong similarity to the Airbnb brand, but that signal is consistent with the site's stated marketplace presentation and was not accompanied by evidence of a deceptive clone. Behavioral collection recorded some unusual network and page-mutation characteristics, yet the observed requests and submissions were not directed to untrusted destinations and no cloaking or malicious script behavior was identified. The domain's established registration continuity and substantial historical record further support provenance consistent with an established site.

EVIDENCE

- The homepage presents accommodation listings, Colombian-peso pricing, guest ratings, destination categories, and Airbnb marketplace functions.
- The domain was registered in 2012 and is 13.88 years old.
- Web archives contain 5,000 snapshots from 2014-09-16 through 2021-03-28, spanning 8 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist match.

Regulatory Verification Notes

The footer provides links to help, terms, and company information, which is consistent with a mature consumer marketplace. The available material does not independently verify the real-world operator identity, and the site does not present a licensing claim or licensing number in the supplied content; for a travel marketplace, that is a disclosure and verification matter rather than evidence of fraud. The available third-party broker dataset contained no match, but this is contextual reputation information and does not establish licensing or regulatory

status. Transport security and the identified corporate certificate provide additional infrastructure integrity, without independently proving the operator's identity.

EVIDENCE

- The site's transport encryption uses an OV certificate issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 for Airbnb, Inc., valid through 2026-12-11 23:59:59 UTC.
- The technical service layer is identified as AS20940, AKAMAI-ASN1 - Akamai International B.V., NL.
- The registrar is MarkMonitor, Inc.
- The legal-information area exposes help, terms, and company-information links.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the intended merchant identity corresponds to the official Airbnb business and domain through an established offline or independently sourced channel. The applicable cancellation, refund, guest-protection, and payment-dispute terms should be reviewed on the terms and booking-flow pages, and any licensing or consumer-protection requirements relevant to the jurisdiction should be checked with the responsible registry. Official support and contact channels should also be confirmed independently before resolving account or payment issues.

EVIDENCE

- The homepage contains no sensitive form in the captured page state, so credential and payment handling should be assessed in the authenticated and booking flows separately.
- The footer exposes terms and help pathways suitable for reviewing cancellation, refund, and support procedures.
- The supplied content does not include a licensing authority or license number for independent regulatory confirmation.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. The assessment supports normal browsing and ordinary platform interaction, while the real-world operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge addresses associated with AS16509, AMAZON-02 - Amazon.com, Inc., US; no origin candidate was observed. This architecture is a mitigating control that reduces direct exposure of the underlying service, but it is not by itself proof of legitimacy.

EVIDENCE

- CDN edge infrastructure: 2 observed edge IPs, both associated with AS16509.
- CDN/WAF status: enabled; likely origin IP count: 0.
- The identified CDN/WAF provider is Amazon.com, Inc., US.

Closing Assessment

Proceed with ordinary use subject to independent confirmation of merchant identity, applicable terms, and payment protections before submitting credentials or making a payment.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [airbnb.com.co](#).

- The request stayed on [airbnb.com.co](#). It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor, Inc.. CLEAR
- DNS for this domain is served by [awsdns-38.net](#), across 4 name servers. NOTED
- The registration is paid up to 2027-09-27. NOTED
- The earliest public archive of this site is from 2014-09-16. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [airbnb.com.co](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
