

Is airesclimatizacion.cl legit? TrustSniffer's high-trust assessment: 100/100

airesclimatizacion.cl

Verdict

100

OUT OF 100

HIGH TRUST

airesclimatizacion.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for Aires Climatización, an HVAC engineering company offering project engineering, Revit/BIM, technical inspection and energy audits. Contact email and phone number are visible. The site contains company descriptive text and navigation but no forms or transaction flows.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What airesclimatizacion.cl served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Aires Climatización is a Chilean corporate services website for HVAC engineering and project work, presenting Revit/BIM design, technical inspection, and energy-audit services to prospective clients. Its stated business model is professional consulting and project delivery rather than online retail, financial services, or other transaction-intensive activity.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or blacklist findings were observed. The site presents a coherent small-business profile, describes identifiable HVAC-related services, publishes contact channels, and exposes no login, payment, wallet-connect, or sensitive-data submission flow. Four abuse reports are associated with the hosting IP, but the reporting attribution is to shared data-centre infrastructure and carries low confidence; this is a soft infrastructure-reputation signal, not evidence that the website itself is malicious.

EVIDENCE

- The homepage identifies Aires Climatización and describes HVAC engineering, Revit/BIM, technical inspection, and energy-audit services; no scam red flags were recorded.
- The site's interactive behavior showed no login form, hidden form, external password submission, wallet activity, clipboard manipulation, or cloaking across two successful runs.
- The domain was registered in 2012 and is approximately 13.94 years old.
- The archival record contains 27 snapshots spanning 2014–2026, with 13 years tracked.

Regulatory Verification Notes

The available pages are consistent with a service-oriented engineering business and state that the company has more than 15 years of sector experience. They do not establish an independently verified real-world operator identity, and no professional license, registration number, or licensing authority is presented in the supplied site content; this is a disclosure gap requiring ordinary business verification rather than a scam finding. The available third-party broker dataset contains no match. Transport security and established registration infrastructure provide supporting legitimacy context, while not constituting regulatory approval.

EVIDENCE

- The site's company and contact pages identify the business as Aires Climatización and publish a telephone number and contact email.
- The domain registrar is NIC Chile; the recorded creation date is 2012-09-13T03:48:05Z.
- Hosting is recorded on AS265831, SOC. COMERCIAL WIRENET CHILE LTDA., CL.
- The site's TLS certificate is issued by YR1 with DV validation and is valid to 2026-10-12.

What to Verify Next

Before a credential or payment interaction, an interested counterparty should independently confirm the operating business and responsible individual through Chilean business records or an offline contact route, establish whether any project-specific professional authorization is required, and confirm written contracting, invoicing, service-delivery, and payment-protection terms. Official contact channels should also be validated independently before sensitive information is exchanged.

EVIDENCE

- The homepage provides a stated company name, business description, telephone contact, and email contact.
- The navigation includes company, references, and contact pages but no checkout, account, or transaction workflow.
- The services are described as project-based HVAC engineering, inspection, and energy-audit work rather than an automated online purchase.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The real-world operator identity remains independently unverified, so the legitimacy

assessment is evidence-consistent rather than proven.

Infrastructure Integrity

The site has no detected CDN or WAF and resolves to one likely origin address, representing a direct hosting posture rather than a layered edge-protection design. This neither creates a fraud finding nor independently establishes legitimacy.

Closing Assessment

Normal informational use is proportionate to the evidence; credential or payment engagement should follow the ordinary independent business, contractual, and payment-protection checks described above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 4 reports on hosting IP 190.107.177.243 (MKTWEB Servicios Informáticos SPA, Data Center/Web Hosting/Transit), 3% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airesclimatizacion.cl.

- The request stayed on airesclimatizacion.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by cpanelhost.cl, across 2 name servers. NOTED
- The registration is paid up to 2026-10-12. NOTED
- The earliest public archive of this site is from 2014-03-06. CLEAR
- It is hosted on AS265831, from a server in CL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airesclimatizacion.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
