

Is airforce.mil.ng legit? TrustSniffer's high-trust assessment: 90/100

airforce.mil.ng

Verdict

90

OUT OF 100

HIGH TRUST

airforce.mil.ng appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Official Nigerian Air Force website providing institutional information, news updates, media and recruitment resources. No evidence of financial solicitations or credential-harvesting elements.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official informational portal of the Nigerian Air Force, presenting institutional information, leadership and mission material, historical content, news, publications, media, recruitment resources, and contact options for a public-service audience rather than a commercial or investment purpose.

Scam/Impersonation Risk

No scam, phishing, blacklist, or impersonation contradictions were observed. The homepage and associated content describe a national defence institution and contain no financial solicitation, investment offer, credential-harvesting workflow, login form, or sensitive submission form. A page-level similarity signal associated the hyphenated domain pattern with “force.com,” but the site’s institutional content did not support a finding of brand impersonation. Observed external activity and implementation errors likewise did not lead to sensitive forms, wallet interactions, hidden submissions, cloaking, or non-whitelisted external posts, so they do not presently indicate an abuse pattern.

EVIDENCE

- The homepage identifies the Nigerian Air Force and provides About, Leadership, Mission, News, Publications, Media, Careers, and Contact sections; no financial solicitation or credential-harvesting element was identified.
- The site’s interaction analysis recorded 0 hidden forms, 0 password submissions to external destinations, 0 wallet-connect runs, and 0 wallet-drainer runs.
- The domain history contains 1,270 archive snapshots spanning 2012–2026, with 15 years tracked and a maximum recorded gap of 1 year.

Regulatory Verification Notes

The available pages are consistent with a government or public-service information site, not a financial service requiring a broker, investment, or payments licence. The About, Leadership, Mission, History, Careers, Publications, and Contact material provides substantive institutional context, but the real-world operator identity is not independently verified by the available evidence; the apparent institutional identity should therefore be treated as evidence-consistent rather than proven. The available third-party broker context produced no match, and external reputation checks were clean. No separate financial licensing disclosure is presented, which is a minor transparency consideration for any activity that might later involve recruitment-related payments or other transactions.

EVIDENCE

- The domain was registered on 2010-03-24 and is approximately 16.39 years old; the registrar is Nitda Hostmaster.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-10-14T17:25:45+00:00.
- The homepage title is “Nigerian Air Force | Welcome,” and the page is classified as Government / Official with no sensitive form detected.
- External checks recorded 0 malicious results, 0 suspicious results, and no blacklist finding.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the domain is referenced by an official Nigerian government or Nigerian Air Force channel, rather than relying solely on the site’s own institutional presentation. Any recruitment fee, merchandise transaction, donation request, or other payment instruction should be checked against an independently obtained official notice and appropriate payment-protection arrangements. Contact and support channels should be confirmed through an independent official route, particularly where a transaction or account action is involved.

EVIDENCE

- The site provides institutional contact, Careers, and How to Join sections that can be compared with independently sourced official communications.
- The business model presented on the homepage is informational and non-monetized, with no payment or investment request identified.
- The site links to one social-media domain, providing a possible—but not conclusive—cross-channel reference point.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a low-risk public-service function. The overall trust posture is high, with no observed contradiction indicating scam activity, phishing, or impersonation; however, the operator’s real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Galaxy Backbone PLC in Nigeria, using AS37018, with no CDN or WAF detected and one likely origin address observed. Direct hosting is not inherently adverse here, while the identified hosting provider and resolved network provide a concrete infrastructure attribution; the protective value of the hosting arrangement should nevertheless be treated as mitigating context rather than proof of legitimacy.

EVIDENCE

- Hosted on AS37018, Galaxy Backbone PLC - Galaxy Backbone PLC, NG; registry AFRINIC; country NG.
- The resolved server address is 197.159.69.181, with 1 unique IP and 0 edge IPs identified.
- Transport encryption uses a DV certificate issued by YR1 and valid to 2026-10-14T17:25:45+00:00.

Closing Assessment

Normal informational use is proportionate to the evidence; account or payment actions should follow ordinary independent confirmation of the relevant official channel, transaction purpose, and available payment protections.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
--------	--------

Identity score	73/100
----------------	--------

Identity verification confidence	74%
----------------------------------	-----

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airforce.mil.ng.

- The request stayed on airforce.mil.ng. It was not redirected to another domain. CLEAR
- Registration is published under Nitda Hostmaster. CLEAR
- DNS for this domain is served by galaxybackbone.com, across 2 name servers. NOTED
- The registration is paid up to 2014-03-23. NOTED
- The earliest public archive of this site is from 2012-05-20. CLEAR
- It is hosted on Galaxy Backbone PLC, from a server in NG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airforce.mil.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
