- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Airtel Xstream Play is a consumer streaming-subscription website presenting bundled access to more than 25 OTT platforms, including Netflix, JioHotstar, and Zee5, alongside movies, television shows, web series, and live sports. Its apparent business model is to sell paid plans, including a displayed ₹279-per-month option, supported by app downloads, subscription activation, and device compatibility across television, web, and mobile.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent subscription-streaming service rather than a deceptive investment, wallet, or credential-harvesting proposition, and the supplied page analysis found no phishing indicators, brand-impersonation indicators, malicious content, or sensitive forms. The behavioral capture did record substantial external network activity and console errors, but it also found no hidden forms, externally submitted password fields, cloaking, wallet activity, clipboard manipulation, or other high-risk abuse pattern; these observations are therefore better treated as implementation or telemetry noise than as evidence of impersonation.

EVIDENCE

- The homepage describes Airtel Xstream Play as a streaming-subscription service and contains app-download and subscription prompts without a sensitive input form.
- Browser execution found no hidden forms, password-external forms, cloaking, wallet-provider activity, wallet-drainer activity, or clipboard hijacking.
- External reputation checks recorded no malicious or suspicious detections and no phishing or impersonation contradiction.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate consumer service, while independently verified operator identity remains unresolved. The registration record lists Bharti Airtel Limited and GoDaddy.com, LLC, providing useful identity-associated context without proving that the website is operated by that entity. The supplied page material does not establish a regulated-financial activity or provide a license or registration reference; this is a verification and disclosure point, not evidence of a scam. No adverse third-party broker-reputation signal was present.

EVIDENCE

- The domain was registered on 2018-08-31 and is approximately 7.95 years old; the registrar is GoDaddy.com, LLC, and the registration record lists Bharti Airtel Limited.
- Web archives contain 343 snapshots from 2019-06-24 through 2026-07-23, covering 8 tracked years.
- The site is served from AS396982, Google Cloud Platform—Google LLC, US.
- The TLS certificate is issued by WR3 at DV validation level and is valid to 2026-08-26.

What to Verify Next

Before credential or payment interaction, independently confirm the legal merchant identity through an authoritative corporate or service channel rather than relying solely on the website's presentation. Review the applicable cancellation, refund, renewal, and payment-protection terms at the point of purchase, and confirm that any application-download destination is the publisher's official distribution channel. Independent confirmation of the claimed OTT-partner entitlements is also appropriate where those entitlements affect the purchase decision.

EVIDENCE

- The homepage directs visitors toward subscription activation and application download, making the merchant identity and distribution channel relevant pre-transaction checks.
- The available page material presents pricing and subscription mechanics, making cancellation, renewal, refund, and payment-protection terms relevant to purchase review.
- Independent operator-identity verification is not established by the supplied evidence and should be completed through an authoritative external channel.

Summary Verdict

The website has a high-trust, low-risk posture and is evidence-consistent with an established, apparently legitimate service. No scam, phishing, impersonation, or other contradictory signal was identified, although the real-world operator identity is not independently verified.

Infrastructure Integrity

The deployment resolves to a single likely origin address, with no CDN edge layer detected. This architecture provides less edge-layer shielding than a proxied deployment, but the observed hosting arrangement does not itself indicate malicious activity and should be treated only as a mitigating technical consideration.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to the independent merchant-identity, terms, and payment-protection checks described above before account or payment actions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airtelxstream.in.

- The request stayed on airtelxstream.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-55.net, across 4 name servers. NOTED
- The registration is paid up to 2028-08-31. CLEAR
- The earliest public archive of this site is from 2019-06-24. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airtelxstream.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
