

Is airtickets.com a scam? TrustSniffer's high-risk assessment: 0/100

airtickets.com

Verdict

0

OUT OF 100

CRITICAL RISK

airtickets.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

The page displays a standard hosting 'Account Suspended' notice with no functional content, links, forms, or business information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	23 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	2 months old Most scam domains are under a year old	RISK
Web archive	Archived since 2010 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

What airtickets.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only a hosting-provider “Account Suspended” page. It offers no functional content, business description, products, services, contact forms, or visible explanation of an operating entity; its apparent purpose therefore cannot be established from the live site.

Scam/Impersonation Risk

The site carries a confirmed blacklist finding, with multiple malicious detections from external security sources and additional suspicious detections. This is the decisive risk signal and supports a clearly cautionary posture for sensitive interaction. The live page itself does not display a login form, payment mechanism, wallet connection, phishing form, or identifiable brand impersonation; however, the absence of active content does not neutralize the external threat findings. The provenance record is also internally inconsistent: current registration telemetry dates the domain to 2026, while historical records show activity from 2010 through 2018. No conflicting legal-entity names were observed because no legal identity is presented on the suspended page.

EVIDENCE

- The live homepage displays “Account Suspended” and directs visitors to contact the hosting provider, with no business or identity information.
- Current registration telemetry records creation on 2026-07-13 and an age of approximately 0.19 years.
- Historical records contain 51 archive snapshots spanning 2010–2018, covering 9 years of tracked activity.
- External security assessment recorded 23 malicious and 2 suspicious detections, with blacklist status confirmed by two sources.

Regulatory Verification Notes

Regulatory and corporate verification cannot be completed from the live site because the suspended page contains no legal pages, operator name, license claim, registration number, terms, or service disclosures. The operator identity remains unverified, and no regulated status is established by the available evidence.

Registration through Webcentral Group Ltd and valid domain transport encryption are administrative and technical facts only; neither establishes licensing, ownership, or authorization. The absence of a broker-dataset match is contextual and does not constitute a regulatory clearance.

EVIDENCE

- The homepage contains no legal notice, terms page, privacy statement, license number, or corporate identity.
- The domain is registered through Webcentral Group Ltd.
- The site is hosted on AS209341, WHG-FRA – WHG Hosting Services Ltd, GB.
- TLS uses issuer YR1 with DV validation and is valid through 2026-12-12.

What to Verify Next

The domain should not be used for authentication, credential submission, financial activity, or other sensitive interaction unless its status is independently resolved. Any claimed operator or service should be confirmed through an authoritative corporate or regulatory registry reached independently of the site, and contact details should be validated through an offline or separately sourced channel. If the domain is encountered in an email, advertisement, or referral, the original source and destination should also be investigated before further engagement.

EVIDENCE

- The homepage provides no functional service, account, payment, or contact workflow to validate.
- The page title and visible content identify only an account-suspended or parked state.
- No login form, hidden sensitive form, wallet connection, or external form submission was observed.

Summary Verdict

The website has a **critical trust posture** and presents unacceptable risk for sensitive interaction. Its identity and operating purpose are unverified, while confirmed external security detections materially outweigh the limited technical evidence showing that the domain resolves and uses transport encryption.

Infrastructure Integrity

The site resolves directly to 192.250.229.77 in GB and is hosted by WHG-FRA – WHG Hosting Services Ltd, without a detected CDN or WAF layer. Direct hosting does not itself establish maliciousness, but it provides no protective infrastructure signal capable of offsetting the confirmed reputation risk; the DV certificate protects the connection, not the legitimacy of the operator or content.

EVIDENCE

- Resolved infrastructure: 192.250.229.77 in GB; no CDN edge IP was identified.
- Hosting infrastructure reports one resolved IP and one likely origin IP.
- The transport certificate is DV-validated and issued by YR1.

Closing Assessment

Enterprise users should treat the domain as unsuitable for credentials, account access, payments, or other sensitive activity until its operator, purpose, and security status are independently established.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airtickets.com.

- The request stayed on airtickets.com. It was not redirected to another domain. CLEAR
- Registration is published under Webcentral Group Ltd. CLEAR
- DNS for this domain is served by verpex.com, across 4 name servers. NOTED
- The registration is paid up to 2027-07-13. NOTED
- The earliest public archive of this site is from 2010-02-27. CLEAR
- It is hosted on WHG-FRA, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airtickets.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
