

Is airwind.eu a scam? TrustSniffer's high-risk assessment: 0/100

airwind.eu

Verdict

0

OUT OF 100

CRITICAL RISK

airwind.eu shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Polish-language website for Airwind offering sales, installation and servicing of air conditioning, thermal cameras, external shutters, heat pumps, monitoring and electrical installations. Page lists brands and contact/navigation elements; appears to be a straightforward local services business.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://airwind.eu/>

What airwind.eu served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Airwind.eu is a Polish-language local-services website presenting Airwind as a provider of air-conditioning sales, installation and servicing, alongside thermal cameras, external shutters, heat pumps, thermal modernisation, monitoring and electrical installation services. Its apparent business model is the sale of equipment, installation work and related service contracts for residential, office and commercial customers.

Scam/Impersonation Risk

The site content itself presents a conventional local-services profile and does not show a login form, credential-collection mechanism, wallet connection, hidden form or obvious deceptive browser behaviour. However, this benign presentation is materially outweighed by confirmed external threat detections: the domain is recorded on blacklists, with fourteen malicious and one suspicious detections in the evaluated reputation results, including detections from two established security vendors. The available evidence does not show conflicting legal names or page-level brand impersonation, but the external detections constitute a serious contradiction to the site's

otherwise ordinary presentation. Sensitive interaction with the domain should therefore be treated as unsafe pending independent resolution of the detections.

EVIDENCE

- Homepage: Presents Airwind as a local service provider and contains no login or sensitive-data form.
- External reputation results: Recorded 14 malicious detections and 1 suspicious detection.
- External reputation results: Confirmed blacklist status with detections attributed to multiple external sources.
- Domain and archive records: Domain age recorded as 4.73 years; 116 archive snapshots spanning 2021–2023, with 3 years tracked.

Regulatory Verification Notes

The site's visible navigation includes service, pricing, partners and contact areas, but the supplied content does not state a licensing authority or license number. The real-world operator remains independently unverified, and the available governance and ownership information is insufficient to establish which legal entity would bear responsibility for contracts, payments or service delivery. This is a verification gap rather than a separate finding of fraud, but it is particularly important given the confirmed external reputation warnings. The valid transport certificate and identifiable hosting arrangements provide technical continuity, not proof of legal identity or regulatory standing.

EVIDENCE

- Homepage: Identifies the business as “Airwind” and lists HVAC, monitoring, electrical and related installation services without a stated licensing authority or license number.
- Registration and archive records: Domain age recorded as 4.73 years; 116 archive snapshots spanning 2021–2023.
- Hosting infrastructure: Served on AS12824 through HOMEPL-AS – home.pl sp. z o.o., Poland.
- Transport encryption: DV certificate issued by “home pl DV TLS G2 R35 CA”, valid to 2027-01-07.

What to Verify Next

Before any sensitive interaction, an organisation should independently confirm the operating entity, physical business details and contractual counterparty through an offline or independently sourced channel rather than relying solely on the website. Where the proposed work falls within a regulated or certification-dependent activity, the relevant Polish registry or licensing body should be checked against the exact legal entity and scope of services. Security teams should also retain the domain and any downloaded material for endpoint and reputation re-evaluation before permitting access from corporate systems.

EVIDENCE

- Contact page: Use the published contact route only as a starting point for independent confirmation of the business identity.
- Service and pricing pages: Match quotations, warranty terms and payment instructions to a verified legal counterparty.
- External reputation status: Recheck the domain's malicious and blacklist findings before allowing credentials, payments or business-system access.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the website resembles a straightforward local-services business, the confirmed external threat detections and blacklist status prevent the available evidence from supporting trust in the domain for credentials, payments or other high-impact activity.

Infrastructure Integrity

The domain resolves directly to a single hosting endpoint on HOMEPL-AS – home.pl sp. z o.o. in Poland, identified as AS12824, with no CDN or WAF detected. Its DV TLS certificate provides encrypted transport, but the absence of an intermediary protective layer means that this infrastructure should be treated only as a technical hosting arrangement and not as evidence of legitimacy.

Closing Assessment

Engagement should remain suspended for sensitive actions unless the operator, contractual entity and security status are independently validated; credentials, financial information and access from trusted corporate environments should not be provided to the domain in its present state.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of airwind.eu.

- The request stayed on airwind.eu. It was not redirected to another domain. CLEAR
- Registration is published under home.pl sp. z o.o.. CLEAR
- DNS for this domain is served by eu for more info.. NOTED
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on HOMEPL-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about airwind.eu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
