

Is ais.th legit? TrustSniffer's high-trust assessment: 100/100

ais.th

Verdict

100

OUT OF 100

HIGH TRUST

ais.th appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate page for AIS (Thailand) listing mobile and broadband packages, device store, entertainment bundles, digital services (AI, identity, payments), business solutions, promotions and customer support information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is an apparently established corporate telecommunications and digital-services portal for AIS in Thailand, presenting mobile and fiber-broadband subscriptions, device sales, entertainment bundles, customer support, business solutions, and related AI, identity, payment, and insurance services.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or other direct contradiction was observed. The site's substantial corporate content, established historical continuity, and ordinary telecommunications business model are consistent with an apparently legitimate service provider. One abuse report associated with shared Cloudflare infrastructure is not materially attributable to this website: the address was whitelisted, the confidence score was zero, and the report was explicitly discounted as applying to shared provider infrastructure.

EVIDENCE

- The homepage and consumer pages present AIS-branded mobile, broadband, device, entertainment, support, and business-service content without detected phishing indicators or sensitive credential forms.
- The domain was registered in 2020 and is approximately 5.48 years old; archival records show 229 snapshots spanning 2021–2024 across 4 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or safe-browsing hit; the domain is ranked 17,752 globally and is within the top 1 million.

Regulatory Verification Notes

The site presents a corporate telecom and digital-services operation, but the available evidence does not independently verify the real-world operator identity. Licensing and registration disclosures for the financial-adjacent services are unclear, so those services should be treated as requiring ordinary regulatory confirmation rather than assumed to carry the same verification basis as telecommunications subscriptions. The available broker-reputation dataset contained no match; this is contextual support only and is not a licensing or regulatory determination.

EVIDENCE

- The consumer page identifies the business model through mobile plans, fiber broadband, device sales, entertainment services, digital services, payments, insurance, identity functions, and customer support.
- The site's domain registrar is THNIC.
- The site's hosting infrastructure is served from AS13335 (Cloudflare); the TLS certificate is an EV certificate issued by GlobalSign GCC R3 EV TLS CA 2025 to Advanced Info Service Public Company Limited, valid through 2026-10-26.
- The available third-party broker dataset recorded no matching entity.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant or service-provider identity through an official corporate or regulatory source, review the applicable terms, cancellation and return conditions, and confirm the payment-protection process offered for purchases. For services involving payments, insurance, or identity functions, confirm the responsible legal entity and its authorization with the relevant regulator. Official contact channels should also be confirmed through an independent source before resolving account or payment issues.

EVIDENCE

- The site contains customer-support and online-store pathways, making independent confirmation of transaction and support procedures practicable.
- The site offers services extending beyond connectivity, so responsibility for each service should be checked against the applicable terms and regulatory records.
- The site's transport encryption uses an EV certificate with a named subject organization, providing a concrete basis for comparing independently obtained corporate details.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports normal browsing and ordinary service interaction, while the real-world operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN and WAF infrastructure, which mitigates direct exposure of the service infrastructure and is a positive defensive control, but does not by itself establish legitimacy. The observed deployment includes Cloudflare edge infrastructure and a potential origin candidate, so infrastructure protection should be treated as mitigation rather than identity proof.

Closing Assessment

Proceed with ordinary business safeguards, including independent identity, terms, and payment-protection checks before submitting credentials or making payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 2606:4700::6812:432 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ais.th.

- The request stayed on ais.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by ais.th, across 2 name servers. NOTED
- The earliest public archive of this site is from 2021-02-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ais.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
